First National Congress on Public Services installed in Miranda

With the aim of empowering the People's Power in the monitoring and control of drinking water, gas, electricity and transportation services, the I National Congress of Public Services, Miranda chapter, was installed.

"We have organized this Congress with the intention of forming a National Network of Public Services, which we have called Renacer, taking into consideration the second line of the 3R, instructed by the President of the Republic, Nicolás Maduro, which will allow the construction of a social fabric that presents us with a map of solutions and helps us to attend to services immediately", informed the sectoral vice-president of Public Works and Services, G/J Néstor Reverol .

The National Congress of Public Services will be deployed in the 23 states of the country and the Capital District, and in each one four working groups will be formed in the areas of citizen participation, scientific-technical development, management model and local experiences in matters of public services.

The Sectoral Vice President indicated that firstly, the purpose of the Congress is to create a joint planning and structure, with all the expressions of People's Power, secondly, street parliamentarism is added with

The Congress will be deployed in the 23 states of the country

the deputies of the National Assembly, with the regional and local government, to achieve stability and reliability of public services.

The also head of the Ministry of People's Power for Electric Energy, stressed that this activity allows for immediate action, the search for early victories and solutions in real time, with the different expressions of People's Power in the Mirandino territory , to go to debate with the technical tables of water, electricity and gas.

He pointed out that a national commissioner dependent on the Vice Presidency of Public Services will be appointed to monitor all early warning systems together with the communities, and also a state commissioner of Public Services, who will allow

articulating strategies , presenting projects and requesting resources before the Federal Government Council.

The governor of the Bolivarian state of Miranda, Héctor Rodríguez, thanked the development of this National Congress of Public Services, which will help to immediately meet the needs in terms of electricity, water, gas, transportation, solid waste and public works in the entity.

Likewise, the president of the Administration and Services Commission of the National Assembly, deputy William Gil, applauded this initiative that includes the People's Power to detect and strengthen the needs in terms of public services.

UNES students

Minister Lorca swore in new brigadistas Against Climate Change and Guardians of the Tree

The new brigade members join 5,000 young people in the process of training in environmental matters

The People's Power Minister for Ecosocialism, Josué Lorca, swore in students from the National University for Security (UNES), as brigade members against Climate Change and Guardians of the Tree, in an act that took place in the multipurpose patio of the educational institution in the Sucre parish (Catia) of the capital.

At the ceremony, a group of UNES students also committed and swore in as Agrourban Brigadistas, whose oath-taking was in charge of the head of the Ministry of Urban Agriculture, Greicys Barrios.

Lorca pointed out that the action corresponds to "a single

united government, working to guarantee the future, the peace of the country and life. All the Ministries unified around that purpose and us, specifically, in the Fifth Objective of the Plan for the Homeland".

"Together with the UNES, we have advanced many very good plans, which include the training of park rangers and forest firefighters, to ensure the protection of protected areas. Now the formation of Brigades against Climate Change and Guardians of the Tree is added", he said.

He added that "we are committed to this year and we are going to start the production cycle, bagging and

sowing the seeds, so that when the rainy season starts we can plant 500,000 trees."

"Today we are delivering the first kit of community nurseries, so that within five months, we can begin to establish 500,000 plants, which will be added to the national goal of five million trees for this year, in commemoration of the 200th anniversary of the Decree from Chuquisaca," he stated.

He assured that "the Brigades Against Climate Change are new, recently born. It has a growth goal in these first six months of five thousand young

people trained, for the diffusion and permanent formation against this world crisis, a planetary disaster that capitalism has generated, such as climate change", he pointed out.

Agro-urban Brigades

For her part, the Minister of Urban Agriculture, Greicys Barrios, said that the action is joint between the Ministry for Ecosocialism, Urban Agriculture and the UNES, which means "a beautiful experience that has been constituted in the swearing-in of Agroproductive Brigades and against climate change",

"In this space are the young students of this university, now

committed to carrying out training and production activities in the 39 sites that UNES has in the national territory," he said.

He commented that "there are more than 53,000 students that this university has, who take the oath and assume this double commitment, both eco-socialist and productive, among which there is not much comparison, because it is about food security and life, to through what the Ministry for Ecosocialism promotes."

"Today we have taken this

space to start the reference, with the activation of 390 square meters in which there are 20 productive beds, which will contain more than 10 vegetable items, and will have the production of more than 4,700 kilograms of food in three months", assured.

He added that the site is the "reference that tells us that we can sow and take it from any usable place to start both the training experience and the production of food."

"We are doing all of this as part of the execution of our

Carabobo 200 Agro -urban Plan ", as our president Nicolás Maduro has directed, and for the strengthening of the Great Agro-Venezuela Mission, which now includes UNES students committed to life for food production and the safety of all," he said.

Debate begins on the Management Plan and Regulations for the Use of the Caparo Forest Reserve

The Ministry of People's Power for Ecosocialism (Minec), and the mayors of the Pedraza and Andrés Eloy Blanco municipalities of Barinas state, began the debates regarding the Plan for the Management and Regulation of use of the Caparo Forest Reserve.

The Vice Minister of Environmental Management of Minec, Hernán Toro, described the meeting as "very important, since we held a meeting to present the scope of this project that we propose," he stressed.

He affirmed that as of March 14th, it will take place in the Caparo Forest Reserve a popular consultation with the

five communities that comprise it.

He recalled that it is available to the entire population on the

Minec website www.minec.gob.ve, the forms to be downloaded and the approaches that are considered must be taken into account, and thus strengthen the proposal.

The proposals can be sent to

On March 14, an approach will be held in the communities of the Caparo Forest Reserve

To date, more than one million 800 thousand spaces have been served

Disinfection and maintenance day at the Ruiz Pineda Recreational Park

The Ministry of Popular Power for Ecosocialism (Minec) carried out a disinfection, cleaning and maintenance day at the Ruiz Pineda Recreational Park, located in Montalbán, a sector of the La Vega parish in Caracas.

At the forefront of the actions was the head of the Minec, Josué Lorca, who stated that the operations are daily and constitute the regularity of the Bolivarian Government led by President Nicolás Maduro "to guarantee the good life of the population".

"These disinfection days are carried out throughout the country. We have been doing it together with the People's Power for almost two years, in the spaces most visited and crowded by Venezuelans," he said.

He commented that this time it was for the "Ruiz Pineda de Montalbán Recreational Park, recently reopened, with the news of having courts made with

The operations are carried out for the health and good living of Venezuelans

material from end-of-life tires (NFU), which makes them ecological, for the enjoyment of all".

"The place has become the epicenter of the visits of all the inhabitants of the sector. Because of this, we have decided to hold

these disinfection days, number 97 so far this year. More than one million 800 thousand spaces have been attended with the participation of 522 brigades deployed throughout the Venezuelan territory", he indicated.

He argued that the operation is an "effort made by the

Bolivarian Government together with the Presidential Commission for the Control and Prevention of Covid-19, to guarantee good living and health to the Venezuelan people".

"This is the first time we work at the Ruiz Pineda. Normally, we are deployed in the Generalissimo Francisco de Miranda, Alí Primera, Los Chorros and the Caricuao Zoo, as far as the city of Caracas is concerned, and in the country's main parks, because they are the places where the Venezuelans," he said.

He recalled that the mobilization of disinfection is national "in the places with the highest traffic of the population. Usually, these sessions are cyclical because they are repeated from time to time".

Minister Lorca supervised the activity

After complaints at the 0800-Ambiente

Capuchin monkey rescued in the Sucre parish of Caracas

The specimen was moved to the Caricuao Zoo

A commission made up of personnel from the National Parks Institute (Inparques) and the

free telephone service 0800-AMBIENTE (0800.242.63.68), who expressed excesses of people with the monkey due to the behavior of

Ecosocialist Territorial Unit (UTE) Capital District, of the Ministry of People's Power for Ecosocialism (Minec), located and rescued a capuchin monkey in the El Atlántico sector of the Sucre parish (Catia), in Caracas.

The animal was denounced by users through the

the specimen for not being in its habitat.

The commission attended to the claim and located the Capuchin in a house in the mentioned place, which did not present the minimum conditions for lodging, under the care of a citizen.

The procedure was carried out in compliance with the regulations established in environmental matters, to guarantee the capture and subsequent attention, which contemplates the custody of Inparques and Minec, and transferred to the Caricuao Zoological Park, for the corresponding veterinary review and the 40 days of quarantine.

Venezuelan Federation of Students received the equipment

Supplies delivered to strengthen environmental training

In compliance with the agreements established between the Minec, in the figure of Minister Josué Lorca and the Venezuelan Federation of Students (FVEU) this Sunday at the facilities of the Livia Gouverneur student residence, the delivery of 20 bicycles, 1 nursery kit for the production of 3 thousand plants and 80 flannels.

The president of Fundambiente, Jesús Méndez, stressed that "the initial goal is 3,000 plants to be produced on this terrace, where there are ornamental fruit plants,

medicinal plants and short-cycle items to set an example and contribute to the preservation of the environment".

Likewise, the provision of bicycles will strengthen the use of bicycle lanes in the capital by university students. These actions seek to strengthen the environmental education of our people and contribute to the realization of the 5th historical objective of the Plan de la Patria

The delivered bicycles will strengthen the use of bike lanes

Law as well as the 3R.NETS directed by President Nicolás Maduro.

GETTING TO KNOW VENEZUELA

Santos Luzardo National Park is home to the second largest freshwater beach in Latin America

It was created in 1988 according to presidential decree No. 2018 on February 24

The Santos Luzardo National Park, also known as the Cinaruco - Capanaparo National Park (or vice versa), is located between the Capanaparo and Cinaruco rivers and their confluence with the Orinoco River, in the jurisdiction of the Pedro Camejo and Achaguas municipalities of Apure state.

It was created in 1988 according to presidential decree No. 2018 on February 24, decreed by President Jaime Lusinchi, to protect the ecosystem of the flat landscape. It is under the protection of the National Institute of Parks of Venezuela (INPARQUES), which assumes a systematic policy of conservation and preservation

of the park's natural resources.

There is a great variety of flora in the park, among them we have: Saladillo, conger eel,

oak, caramacate, dragon tree, saman, coco de mono and cañafístula, among other plant species. It has a blanket of grass (saeta) that occurs throughout the park and that in winter gives it a very beautiful landscape tone.

This important Venezuelan park covers an area of 584,368 hectares. The climate of the park is hot and dry, divided into two periods: from December to March it is arid and from April to November it is the rainy season.

Macanilla freshwater beach, considered the largest in Venezuela and the second in Latin America, another of the main attractions are the Galeras de Cinaruco, unique rock formations in the Venezuelan plains.

The Park has an area of 584,368 hectares
