In order to optimize public services in the Capital

Congress of Public Services installed in Caracas

The congress has spread throughout the country

This Friday, at the Military Academy of the Bolivarian National Guard (Amgnb), in Fort Tiuna, Caracas, the Congress of Services, Capital District chapter, was installed.

The activation was in charge of the Vice President of Public Works and Services, G/J Néstor Reverol, who is also Minister of Popular Power for Electric Energy; the president of the Permanent Commission of Administration and Services of the National Assembly (AN), William Gil; the mayor of Caracas, A/J Carmen Meléndez and the Head of Government of the Capital District, Nahúm Fernández.

In addition, the minister of the People's Power for Ecosocialism, Josué Lorca; Transportation, Hipólito Abreu; Attention to the Waters, G/D Rodolfo Marcos Torres; Public Works, G/D Raúl Paredes; Telephones of Venezuela Limited Company (Cantv), M/G Jesús Aldana and Petróleos de Venezuela Limited Company (PDVSA) Communal Gas, Caryl Bertho.

During the meeting, a work table was held, in which the topics of action for the development of each of the territories in the areas of electricity, drinking water, domestic gas, solid waste collection,

telecommunications, transportation and road.

This National Congress of Public Services will be deployed in the 32 parishes of the Capital District, guaranteeing a better service to each of the citizens.

Following the guidelines of the 3R.Nets, instructed by the President of the Republic, Nicolás Maduro, this network of public services called Renacer, will allow the construction of solutions that help address service problems immediately.

The Vice Ministry for the Preservation of Biodiversity and Life was created

Presidential Commission Against Climate Change Installed

Last Thursday, the Presidential Commission Against Climate Change was installed, with the participation of representatives of the ministries of the Bolivarian Government.

The People's Power Minister for Ecosocialism, Josué Lorca, stated that this commission will be the organizing body between the national government and the various ministries, governors, mayors and the various public powers.

He indicated that a National Authority will be established that, despite the blockade, can "access funds for all projects that have to do with environmental recovery and restoration".

Lorca recalled that the Presidential Commission for the Green Climate Fund was recently created, which "will

They will present to the AN a preliminary draft of the Climate Change Management Law

allow us to access funds for all projects that have to do with the recovery and environmental restoration of the country".

National Plans for Adaptation and Mitigation to the environmental crisis.

The minister indicated that at the meeting, the Vice Ministry for the Preservation of Biodiversity and Life was created, which will have the General Directorate for adaptation and mitigation to climate change and the creation of the

Lorca reported the presentation of the preliminary draft of the Climate Change Management Law to be discussed by this commission and subsequently submitted to the President of the Republic and the National Assembly.

"The proposal is novel and comes to complement all the decisions of the National Government, so that it is not only the central government and the Bolivarian Revolution, but also private companies and universities, that are committed to the care and preservation of Mother Earth," he assured.

Various institutions make up the commission

In the Aragua state

Forest Fire Station inaugurated

Ministers Lorca and Ceballos inaugurated the space

On the occasion of commemorating the Day of the Forest Combatant in the state of Aragua, the Ministry of People's Power for Ecosocialism (Minec), the Sectoral Vice Presidency of Citizen Security and the Governor's Office of the entity, inaugurated the Forest Fire Station "Cap /B Alirio de Jesús Quintero" Las Cocuizas, in the Henri Pittier National Park, located in the Girardot municipality.

A mass preceded the tour of the authorities through the modern structure of 410 square meters, which was conceived, equipped with all the services, and equipped for the accommodation and permanence of the local firefighters.

The head of Ecosocialism, Josué Lorca, during the opening ceremony, delivered three upgraded vehicles: a multipurpose unit, a truck for suppression of forest fires with a capacity of 10,000 liters of water,

and Minister of the Interior, Justice and Peace, A/J Remigio Ceballos Ichaso , provided four enduro-type motorcycles for immediate reaction to fires, pre- hospital equipment and personal protection for firefighters.

In this regard, Minister Lorca pointed out that "the day has been very special because we have made a gigantic effort to coordinate between the regional governments, the Legislative Power and the Executive Power

to hold a joint session in which we are recognizing the value of this day of forest fighters.

"We are submitting a proposal for consideration so that this day, which is a regional date distinguished

and a as the Day of the Forest vehicle Combatant in commemoration for of a tragedy that occurred in suppression 1996, in which seven fellow on of 'smoke swallows' volunteers forest died, be recognized as the fires, with National Day of the Forest a Fighter," he said.

capacity of 14 "Today we can say that the thousand Aragua state is safe and armored liters of to build ecosocialism, while water. preventing forest fires", he said.

Likewise, He recalled that "the Firefighters the Vice Law brings together all the President firefighters and rescuers in the of Citizen country, and what we want is to Security bring order in accordance with the law that was signed in 2015 by President Maduro".

"We are organizing ourselves to strengthen the Risk Management System and we are moving towards its empowerment. Here we are delivering a significant amount of materials. In addition, damaged equipment such as rescue respirators has begun to be repaired," he said.

The activity commemorated the day of the forest combatant

V Assembly of the United Nations for the Environment UNEA-5

Venezuela ratified commitments to the preservation of life on the planet

The Bolivarian Republic of Venezuela ratified its commitment to the preservation of life on the planet, at the V Assembly of the United Nations for the Environment UNEA-5, which was held in the city of Nairobi, capital of Kenya.

On the occasion of the 50th anniversary of the creation of the United Nations Environment Program (UNEP), the meeting was held in the African city on March 3th and 4th, in pursuit of "Strengthening UNEP for the implementation of the environmental dimension in the 2030 Agenda for Sustainable Development".

The Venezuelan delegation announced that important resolutions on environmental matters were adopted, among which the historic approval of working on the creation of a legally binding instrument to combat pollution produced by plastic stands out.

The Venezuelan delegation defended the country's progress in environmental matters

The representative of Venezuela, Jesús Manzanilla, stated that "unilateral coercive measures are anachronistic and antagonistic to multilateralism. Their eradication cannot be postponed in order to face the environmental crisis".

materials, capacity building, scientific-technical cooperation, until you manage to live in harmony with nature.

3,000 people participated in the sessions in person, 1,500 connected online from 175 Member States of the United Nations Organization (UN), including 79 ministers and 17 high-level officials.

The Assembly adopted 14 resolutions, two declarations and a decision on the reduction of pollution and for the protection and restoration of nature.

The summit was held in the city of Nairobi, Kenya

From the Ministry of Popular Power for Ecosocialism (Minec), work will be proactively agreed on a comprehensive instrument that addresses the life cycle of plastics, the promotion of reusable and recyclable

Commemorating the 9 years of the sowing of Commander Hugo Chávez

Installed V Congress of the PSUV and IV of the JPSUV

The congress was opened by President Nicolás Maduro

On March 5, at the Teresa Carreño Theater, President Nicolás Maduro installed the 5th congress of the United Socialist Party of Venezuela

(PSUV) and the 4th congress of its youth, with the presence of more than 2,200 delegates from different regions of the country and social movements linked to party work.

This congress is held in homage to Commander Hugo Chávez within the framework of the commemoration of the 9th anniversary of his sowing, for which a set of tributes and cultural activities were also carried out in the facilities of the Cuartel de la Montaña 4-F as part of scheduled activities.

It is expected that the activities of this 5th congress of the PSUV will last until March 8. It should be noted that the minister of popular power for ecosocialism, Josué Lorca, participates as a full delegate for the ecosocialist movement, which is part of the 25 sectoral movements that are represented at this congress.

Effective action of ecosocialist servers

Successful balance yielded the operation Safe, biosafe and happy Carnivals 2022

As a very positive balance, the action of the public servants of Minec and its attached entities during the past safe, biosafe and happy carnivals 2022 can be described according to the statistics collected by this body.

More than 340,000 Venezuelans visited almost 200 natural spaces in the country, including national and recreational parks, natural monuments, beaches, rivers and zoos. Likewise, more than 1,300 sports, cultural, recreational and ecological activities were carried out during the aforementioned holiday.

Around 12,000 women and men including park rangers, tree guardians, brigades against climate change, forest firefighters, security officials, social and eco-socialist movements were activated on a national scale to preserve natural spaces and their visitors, registering a very high incident rate low, with just 36 confirmed

The Minec workforce was deployed during the operation

incidences of which only one had a fatal outcome.

REFLECTIONS ON ECOSOCIALISM

Migration and Climate Crisis

By Josué Alejandro Lorca Vega

Emigration is not a new issue at all, especially in the countries on the periphery of the globe. The phenomenon of human mobility has been accentuating since the time of the so-called industrial revolution, starting from the mid-eighteenth century, which led to the evolution of the capitalist system to the so-called "globalization of markets" that we live today. In African countries, for example, it is a constant, emigrants see the possibility of reaching Europe, and they try it convinced that, in Europe, job opportunities are greater. The African continent has suffered a true exodus of young people for decades due to political, economic, social, religious crises and tribal wars, for these reasons many risk their lives in the Mediterranean Sea, in their attempt to reach the European continent.

But the latest crisis, and the most serious that humanity faces in this third millennium that we are going through, goes beyond capital, since it is about the real possibility of extinction of the life of all of us, that is, of humanity: this

crisis is none other than the climatic one.

Product of the irrationality of "modern" man who has claimed "infinite" exploitation of the earth, its seas, rivers, forests and ecosystems under

their territories to fight for the prevalence of their lives, as well as their living reproduction:

In 1990 the Intergovernmental Panel on Climate Change (IPCC) noted that human migration could be the most serious consequence of climate change. Millions of people would have to be displaced due to the erosion of the coastline, the flooding of the coastline and the damage to agriculture. Since then, various analysts have attempted to estimate the size of future flows of climate migrants (sometimes called "environmental refugees"), with most predictions for the year 2050 being around 200 million people (Brown, 2008.

the pretext of the developmentalist logic of the modern capitalist system prevailing today.

Thus, our Mother Earth responds to such a systemic maelstrom by abruptly modifying all of its environmental settings. Of course, in the midst of such a crisis, millions of human beings and entire populations are forced to emigrate from

p 9).

In African countries, such as Mali and Somalia, migrants have decided to seek refuge in neighboring countries in the direction of Europe and in both cases, this migratory flow coincides with years of drought and desertification, therefore of poverty and even hunger; According to a United Nations report (2021), through the Office for the

Coordination of Humanitarian Affairs (OCHA): "As of December 17, more than 3.2 million people in 66 of the 74 districts of the country were affected due to the drought; of which 169,000 were displaced in search of water, food and pasture"¹.

The lack of commitment on the part of the so-called first world or industrialized countries to establish clear parameters to mitigate the contemporary climate crisis is of a worrying nature. Article number two of the Paris agreement signed in November 2016, regarding global warming, has been totally breached: "Keep the increase in global average temperature well below 2 °C with respect to pre-industrial levels, and pursue efforts to limit this temperature rise to 1.5 °C above pre-industrial levels, recognizing that this would significantly reduce the risks and impacts of climate change" (p-3); After our presentation before representatives of some two hundred governments of the world, our country honorably signed the agreement or, "Glasgow Pact" during the last summit on climate change (COP-26), held in November last year; Soon new meetings will come where the heads of State and Government of the world will meet to deal with these worrying issues again, since the

current climate crisis, apart from causing large human exoduses to other territories and continents of the world registered until today; it also accelerates the extinction of some species and ecosystems, it is definitely a maximum generator of poverty and misery by causing desertification and droughts throughout millions of kilometers of the globe.

For the survival of the human species in the future, we must make humanity more humane and ecological.

Up to date with Nicolás

@NicolásMaduro

03/04/2022

Let's advance in the recovery of the national minimum wage based on half a Petro, the salarization of the bonuses of the working class and the discussion of new models of collective contracts. For this reason, I commissioned the Vice President @delcyrodriguezv to discuss it with all sectors.

@NicolásMaduro

03/03/2022

In Venezuela it is produced with export quality, and we must go down the path of productive diversification to move forward. Let's continue working for Peace, national unity, prosperity and the development of the digital economy. No one beats work!

@NicolásMaduro

03/02/2022

The main form of war in the world is economic and commercial, with the indiscriminate use of the advantage of the imperial financial system against the peoples. Economic wars must stop! The diplomatic, political path and preserving Peace, is the way.
