Congress of Public Services Installed in the States of Mérida and Falcón

During the congress they outlined roadmaps with solutions

This Wednesday, the National Congress of Public Services, Mérida chapter, was held, during which important issues were addressed, including the start of operations of Conviasa, at the Alberto Carnevali airport in Mérida.

Likewise, the delivery of 150 transformers for the communities and the completion of lighting works in the tunnels of the Rafael Caldera highway were announced, among other solutions in terms of drinking water, environment, transportation, telecommunications and distribution of domestic gas.

The activity took place at the Mucumbarila Convention Center, located in the Libertador municipality (Mérida), led by the sectoral vice-president for Public Services and Minister of the Popular Power for Electric Power, Néstor Reverol, and accompa-

nied, among others, by the Governor Jehyson Guzmán, Rodolfo Marco Torres, Minister of the Popular Power for Water Services; Josué Lorca, Minister of Popular Power for Ecosocialism, Raúl Paredes, Minister of the Popular Power for Public Works, the deputy to the National Assembly, William Gil and 23 mayors of the Andean entity.

Reverol, highlighted the importance of creating a map of solutions to the problems of public services, with the cooperation of all institutional and community actors.

Solution Map

With reference to the strengthening of the electrical system, Reverol announced "the recovery of 950 megawatts in the southwestern region for hydroelectric generation".

Regarding the distribution of do-

mestic gas, he indicated that through the Government Federal Council (GFC), the project of itinerant mobile units with the capacity to equip two thousand cylinders per day has been included, which will allow a supply cycle to be fulfilled every 15 days for distant communities.

Reverol reported that the operation and inspection of the three garbage dumps in the state were discussed, in addition to the creation of a recycling school and the inclusion of the state of Mérida in the National Plan for the Recovery of Compactor Trucks.

Regarding the drinking water service, he highlighted that through the Government Federal Council (GFC), projects were approved for the maintenance of aqueducts and deep well systems.

In this sense, Governor Jehyson Guzmán added that resources were approved to improve the aqueduct of the Sucre municipality (Lagunilla) and the Mucujepe water treatment plant, in the Alberto Adriani municipality (El Vigía).

In terms of transportation, the Mérida Trolcable service will be reactivated. "It will be articulated with a technical operational commission of the workers of Cabletren of the Caracas Metro and Trolcable of Mérida", Reverol explained.

For his part, the Minister of Popular Power for Transportation, Hipólito Abreu, approved a transportation unit for the com-

munity of El Vigía, and highlighted the importance of reactivating the feeder routes to the mass transportation system and the routes for the municipalities of the interior of the state, in all its axes.

Another point discussed was the provision of the service offered by Cantv, which will aim to strengthen the sustained breakdown recovery plan in the state.

Falcon chapter installed

In this same order, last Friday, the Vice President of Public Works and Services, G/J Néstor Reverol, led the installation of the Falcón Chapter Services Congress, which had as its deliberation center the Hotel Brisas de Paraguaná, located in the parish North, Bella Vista sector, Carirubana municipality.

In the development of the congress, the Minister of the Popular

Power for Ecosocialism, Josué Lorca, was present, in addition to the representatives of the institutions that make up the Vice Presidency of Services and Public Works, corresponding to the areas of drinking and sewage water, telephony and internet, and gas supply.

Minister Lorca indicated that with the teams of the institutions, distinguished working groups were formed such as Citizen Participation, Technical Scientific Development, Management Model and Local Experiences.

He pointed out that the procedure has "the purpose of creating the agenda for concrete action and the map of problems, thus guaranteeing the best functioning of all public services".

For his part, on the Instagram social network, the also Minister of

the Popular Power for Electric Energy, Néstor Reverol, stated that the debate instance, which will be in the 24 entities of the country, seeks attention and solutions to the problems raised by the Popular Power.

He pointed out that several commitments emerged from the meeting, among which are: the recovery of the Wind Farm, the installation of the new substation in Chichiriviche, delivery of transformers, recovery of the El Isiro Central Plant line, comprehensive rehabilitation of five water pumping stations served and the beginning of the Strategic Clearance Plan in Médanos de Coro.

"We are going towards the consolidation of the actions of the National Government in the regions with the support of the communities", he assured.

Along with the Popular Power

Lomas del Calvario Landfill Inspected in Mérida

As part of the strategies agreed upon during the Mérida Chapter Public Services Congress, the Minister of the Popular Power for Ecosocialism, Josué Lorca, carried out three inspections in the Sucre municipality of the entity.

During the tour of the Lomas del Calvario landfill, Minister Lorca listened to the demands of the Popular Power and ordered a survey of the needs of the place.

A representative from the Government of Mérida participated, with whom a review was

made of the operations carried out on the site, the storage capacity, the conditions of the pits and the leachate lagoon.

The minister promised to begin the corresponding studies for the environmental sanitation of the area.

Likewise, Minister Lorca visited the Tecnoplas recycling com-

Central and regional governments meshed with the People's Power

pany, located in the Lagunillas parish, to verify the entire production process of medium

and low density hoses for irrigation.

In this regard, he said "this is a productive chain that gives us faith in the ability of our people to recycle all the plastic that is discarded in all homes".

going to multiply throughout the national territory and "simultaneously we will start the training processes in all states, with the birth of the Recycling School, which becomes the incubator of dreams in terms of popular economy".

He added that the initiative is Later, the head of Ecosocialism

went to the San Juan parish, where the Free Ways metalworking company is located , with which he seeks to establish an agreement for the acquisition and repair of the garbage compactor boxes placed in the collection units.

In Support of the Popular Power

Recycling school will be created in Comandante de El Valle Ecosocialist Commune

The recycling school will serve as a showcase for other similar initiatives

Last Monday, the Sectoral Vice Presidency of Public Works and Services, held its weekly meeting to take stock of the efforts carried out and the plans to be developed, in an effort to adapt all the services in the country's communities.

On this occasion, to fulfill commitments made by the Vice President and Minister of the Popular Power for Electric Power, G/J Néstor Reverol ,

spokespersons for the "Ecosocialista Comandante" commune of the El Valle parish, and representatives of the Mayor's Office of Caracas participated in a work table.

The head of Ecosocialism, Josué Lorca, was present at the meeting's debates, in which it was agreed to create a Recycling School in the aforementioned commune, with the purpose of turning the area into a counter for other

community organizations.

Likewise, it was decided to adapt electrical panels, elevator intervention, gas supply review and waterproofing of the roofs of buildings located in the jurisdiction of the commune.

Likewise, it was decided to equip the Infocenter of the Popular House with computers and equipment, the recovery of five sports fields, and assistance to seven educational units with painting work and Internet connection, in addition to the necessary articulations for the activation of a local from Farmapatria.

In this regard, Vice President Reverol indicated that "we will use the 'Ecosocialista Comandante' commune as an example of articulation between the levels of government and the organized people, to empower them in their spaces through the National Network of Public Services (Renaser)".

Articulation in the Realization of Projects

Minister Lorca Received the Executive Secretary of the Government Federal Council

The Minister of the Popular Power for Ecosocialism, Josué Lorca, received in his office the Executive Secretary of the Government Federal Council, Guy Vernaez.

In this regard, the head of Ecosocialism recalled that "the Government Federal Council is the instance of articulation between the municipalities, governorates and the Popular Power".

"We are convinced that only uni-

ted can we meet the Fifth Objective of the Plan for the Homeland, and guarantee the construction of a balanced relationship between nature and human beings," said Lorca.

He added that together with the "Government Federal Council we will be implementing new forms and methods, to generate that public policies in ecosocialist matters are permea-

Lorca and Vernaez agreed to advance ecosocialist projects

ted at all levels".

Climate change Affects the Flowering of the Araguaney Tree

Mission Arbol collected seeds in the Francisco de Miranda Recreational Park

During the activity, 200 kilos of white waste were collected

Public servants from the Ministry of the Popular Power for Ecosocialism and the Fundación Misión went to the Generalissimo Francisco de Miranda Recreational Park, to the east of Greater Caracas, to carry out a day of collecting seeds and at the same time removing white waste, which includes plastics, glass, cardboard, paper and metals such as aluminum.

the Minec Capital District, José Alejandro Azuaje, the coordinator and director of the Francisco de Miranda recreational park, Daniel Márquez and Ezequiel Montilla respectively.

During the mobilization, seven kilos of seeds were collected from the species of Palma Redonda, Cañafistula Llanero, camoruco ,

In the place, at the head of the day, was the president of the Mision Arbol, (Tree Mission) Wilmer Vásquez, who was accompanied by the director of the Mission in the Capital District, Miled Rojas, the director of the Ecosocialist Territorial Unit (UTE) of

Granadillo Ébano, Granadillo Brasilera, Acacia Amarillo, Samán, Andira , Carocaró and Araguaney.

In this regard, Vásquez commented that "climate change has impacted the environment, because the flowering process of the Araguaney tree was brought forward", to remember that the flowering stage of the tree is in the month of May and not in March.

Likewise, the authorities announced that during the sanitation, 200 kilos of white waste could be collected.

Vásquez and Azuaje made a joint call to the Venezuelan population to be aware in the care of the parks and recalled the motto used during the operation of Safe Carnivals 2022: "Give the Tail to your Garbage".

San Felipe El Fuerte Recreational Park Commemorates Another Anniversary

It is the first and only historical park in relic status in the country

The San Felipe el Fuerte Historical Archaeological Park was inaugurated on March 6, 1974 and declared a National Historical Monument in 1985. Currently, the park, also called "La Pompeya Venezolana", for its historical value and being the first of its kind in the country. It is under the administration of the National Institute of Parks (Inparques), an entity attached to the Ministry of the Popular Power for Ecosocialism (Minec).

By 1768, the city of San Felipe El Fuerte had a large population and enjoyed significant commercial activity. This was due to the large cocoa production of the haciendas and the operations of the Guipuzcoana company. The Yaracuy River was then navigable and the products of the valley were shipped in flat-

bottomed barges to the sea. Unfortunately, this economic movement disappeared after the earthquake of 1812, due to the fact that more than half of the population perished in the tragedy.

The San Felipe el Fuerte Recreational Park became the first and only historical park in relic status in Venezuela, under decree No. 1,686 on March 7, 1974, and is another of the territories of life and peace offered by the Bolivarian Government so that the people can enjoy it for free and where environmental education is encouraged, which is aimed at complying with the 5th Historical

Objective of the Plan of the Homeland, in order to contribute to the preservation of life on the planet and the salvation of the human species.

In the spaces of the park there are about one hundred plant species, where you can find samanes, cedars, mangoes, jobos, medlars, jabillos, coffee trees among others. You can also see ancient trees with heights of up to 30 meters and enjoy a fauna made up of species of mammals such as sloths, squirrels and rabipelados, reptiles such as iguanas and snakes; birds, such as guacharacas and parrots.

During his tour, the visitor will come across the old cobbled streets, the central square and a wall of the church of Our Lady of the Presentation. But not only going to this park represents a visit to the past, currently the space serves as a habitat for animals such as sloths or woodpeckers.

The park reached its 48th anniversary

80% of university students in Venezuela belong to public universities, trained with the highest quality. This is only possible thanks to a socialist, Christian, popular and humanist Revolution such as the Bolivarian Revolution. Let's go for new goals!
