## Congress of Public Services Met in Guárico

Activate expressway lighting plan

In order to meet the requests corresponding to the area by the Popular Power, the Congress of Public Services was installed in the town of Calabozo, Guárico state.

The act was presided over by the Sectorial Vice President of Public Works and Services of the Executive Power, G/J Néstor Reverol, who is also Minister of Electric Power, accompanied by the entity's governor, José Vásquez and the deputy to the National Assembly (AN), William Gil, who is in charge of the Permanent Commission of Administration and Services.

Through his account on the Instagram platform, Vice President Reverol stated that the following agreements were established: A lighting plan for expressways; Construction of 15

sports courts; Installation of 3,314 new voice and data services; Delivery of a concrete mixer to the Government; Reorganization of public transport and the entity's airport; implementation of the Planting Life Plan in the Tiznado Hydrographic Basin and the construction of mini liquefied petroleum gas plants.

For his part, the head of Ecosocialism, Josué Lorca, commented that the Congress of Services will meet in all entities of the country, in order to guarantee the good life of the Venezuelan people.

He added that for the deliberations four working groups were formed in the areas of citizen participation, scientific and technical development, management model and local experiences.

## Minister Lorca inspected Barinesa Socialist Company for Solid Waste

Within the framework of the optimization of public services on a national scale, the Minister of Popular Power for Ecosocialism, Josué Lorca, visited the Barinesa Solid Waste Company (Esobades) in the city of Barinas.

The purpose of the visit was to verify the operational capacity and the final disposal site for the waste.

Likewise, it seeks to execute new ideas and projects in order to make this company a spearhead in terms of solid waste collection and management in Venezuela.

To celebrate fifth anniversary

## Videoconference: Socio-Environmental Nuances of the Caura National Park

*In the coordination of the online talk was the Vice Minister of Environmental Management of Minec, Hernán Toro*

On the occasion of the fifth anniversary of the protected area, the Ministry of the Popular Power for Ecosocialism (Minec), developed a discussion via videoconference, on the "Socio-environmental Nuances of the Caura National Park".

The activity concentrated a group of experts who discussed aspects such as the creation of this recreational space, the background, the

importance it has for the country, and what are the contributions of the organized communities in the construction of the Plan of Use and Regulation of Use (PORU).

In the coordination of the online talk was the Vice Minister of Environmental Management of Minec, Hernán Toro, who commented on the preparation of the PORU. "The plan is an important and strategic challenge for the country due to the diverse natural

riches that are in the area," he said.

"We talked about the zoning, the characteristics and fundamental elements that must be considered when discussing the PORU", he said.

Likewise, the installation of a space called "Green Point" was proposed, proposed as a place for meeting, debating within the park, emblematic, for appointments every time a debate is going to be generated.

The Caura National Park is the second largest in the world and the first in Venezuela, with more than 7,500,000 hectares.

In addition to Vice Minister Toro, among the exhibitors was the ecologist Leobardo Acurero, promoter of the denomination of national park; environmentalist and singer-songwriter Leonor Fuget; the general director of the National Institute of Parks (Inparques), Hilda Ángel and the director of Conservation of Ecosystems of Minec, Franklin Linares.

Along with the Popular Power

## Public Services Table Installed in Barlovento

The National Congress of Public Services Chapter Barlovento was installed at the Polytechnic University of Barlovento "Argelia Laya", located in the Brión municipality of Miranda state.

The conformation was in charge of the General Secretary of Right to the City of the

Government of Miranda, Francisco Garcés, with the participation of the mayors of the municipalities Acevedo, Brión, Pedro Gual, Buroz, Páez and Andrés Bello, in addition to the deputies to the National Assembly (AN), Elio Serrano, Liliana González and Rodolfo

*A General Staff of Public Services will be created in the area*

Sanz.

Likewise, representatives of the Hydrology of the Capital Region (Hidrocapital), the Telephone Company of Venezuela (Cantv), the National Electric Corporation (Corpoelec), and the Ministry of the Popular Power for Ecosocialism (Minec) participated, through personnel from the Ecosocialist Territorial Unit (UTEC) Miranda.

Also, spokespersons from the community governments, community councils, technical tables attended, which exposed the problems and possible solutions.

Among the proposals of the meeting, the creation of a general staff of public services of Barlovento was proposed, and to continue the assemblies in each municipality and parish of Barlovento, in order to generate a map of situations and find the answers.

To commemorate World Water Day

## Guarenas Students Showed Water Gallery

Menca I Educational Unit, of the 27 de Febrero Urbanization, in the Guarenas parish of the Plaza municipality of Miranda state, exhibited the "Water Gallery".

The samples are the result of the work of students from the first to fifth grade of the campus, whose inspirations were based on the information received on World Water Day.

Some of the illustrations were selected for the celebration of the 67th anniversary of the Tricolor magazine, which was held at the La Estancia Cultural Center, east of Greater Caracas, they were also chosen to represent the Miranda state by the municipalities of Plaza and Zamora in upcoming educational events.

Young people were reminded how we should make rational use of water resources in homes, the water cycle and how important it is for the environment. Likewise, the theoretical-practical workshop on Californian earthworms was given.

*The representatives received a talk on drug prevention and safety*

Meanwhile, the minors' representatives received a talk on drug prevention and safety for families and schools, led by officials from the National Anti-Drug Office (ONA).

The meeting was attended by 72 representatives of the community, 57 students, 15 teachers, the deputy director and director of

training of the Educational Zone of Plaza and Zamora, ONA staff, a spokesperson from the Plaza Mayor's Office, servants of the Ministry of People's Power for Ecosocialism (Minec) and the National Foundation for Environmental Education (Fundambiente), an entity attached to Minec.

“One student, one tree” method will be applied to the plan in the entity

# Form Recycling Technical Tables in Delta Amacuro

The Ministry of the Popular Power for Ecosocialism (Minec), with representatives of the National Reforestation Company (Conare) and the National Parks Institute (Inparques), agreed to form 50 Recycling and Cleaning Technical Tables (Metras) in two municipalities of the region.

The Metras will be established in the municipalities of Tucupita and Casacoima, in addition, it was decided to establish Reforestation Technical Tables and the raising of innovative proposals with an emphasis on adaptation and mitigation against climate change.

Likewise, it was determined that the plan "One student, one tree" will be developed by the Educational Zone of the Ministry of Education, with guidance from

More than 50 METRAS were installed in two municipalities

Minec and the attached entities. Also, they will carry out a diagnosis of the native plants of the region in danger of extinction, they will create the Tree Maintenance Brigades, and the promotion and reactivation of the nurseries will be in charge of Minec, Inparques and Conare.

## Bararida Zoo and Botanical

# Brigade Members Against Climate Change Collect Seeds in Lara

The advice focused on the forest species Apamate, Flamboyant and Samán

Members of the Brigades Against Climate Change and

environmentalists in the state of Lara, participated in a seed collection day that took place in the entity's Bararida Zoological and Botanical Park. The participants were guided by technical teams from the National Institute of Parks (Inparques), which provided the young people with information about the parent trees and from which the best quality seeds are obtained.

The specialized advice focused on

the forest species apamate, flamboyant and samán, among others. Staff from the Ecosocialist Territorial Unit (UTEC) Lara, from the Ministry of the Popular Power for Ecosocialism (Minec), the Bolivarian National Guard Environmental Nursery (GNB), brigade members against climate change, and the Popular Movement in Defense of the Valle del Rio Turbio and students from the Pablo Characo school participated in the tour.

## REFLECTIONS ON ECOSOCIALISM

# The Ecotourism Potential of Venezuela

By Josué Alejandro Lorca Vega

“Venezuela, land of grace...” an apt expression that describes the natural beauties that our country offers, uttered by the first Europeans to reach our shores of exuberant jungles and crystal clear waters. Even without knowing the majestic nature that these lands treasured inside.

Venezuela presents a melting pot of impressive and unique tourist potentialities in the world, not only for its recognized natural beauty, but also for its delicious gastronomy, its musical variety, the candor of its peoples and its Is-trionic Caribbean essence that guarantees fun and good times.

The perfect combination for dream vacations: Nature, Culture and Fun.

When we talk about Ecotourism, hiking, walks and camping in natural parks are usually evoked in the collective imagination, or those who express greater activism in environmental protection, ecotourism can also be re-

planting trees, accompanying the spawning of turtles or observing and photographing birds. It is a committed tourism in contact with nature.

According to the definition of the World Tourism Organization (a specialized agency of

traditional cultures prevailing in natural areas.

B) It includes pedagogical aspects and interpretation of nature.

C) Usually, but not always, the organization is run by specialized tour operators and is aimed at small groups. In destinations, partner service providers are often small, locally owned businesses.

D) Minimizes negative impacts on the natural and socio-cultural environment.

E) It contributes to the maintenance of the natural areas that constitute the eco-tourism attraction, since:

1. generates economic benefits for host communities,

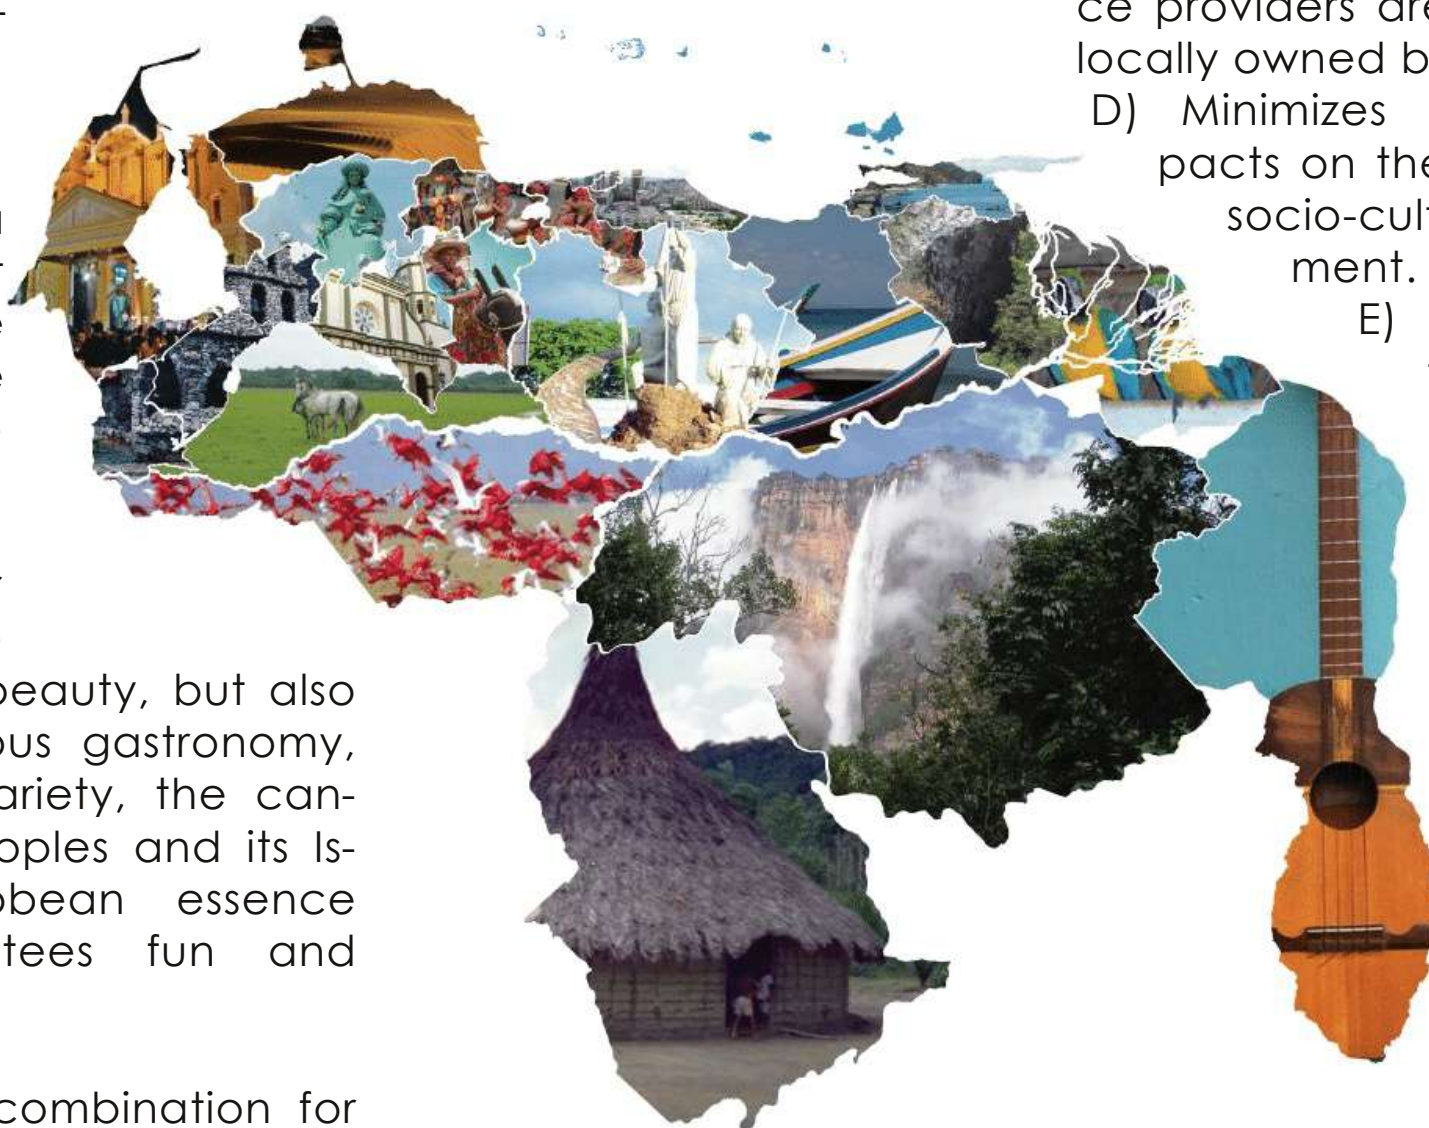

the United Nations), the term "ecotourism" applies to any form of tourism that meets the following characteristics:

A) It revolves around nature and the main motivation of tourists is the observation and appreciation of the natural environment, as well as the

organizations and authorities that manage natural areas for conservation purposes;

2. offers local communities alternative employment and income opportunities;

3. It enhances the awareness of local populations and tourists regarding the importance of conserving natural

and cultural assets.

How we can see Ecotourism is associated with the responsibility that comes with having fun in a natural environment that is beautiful and we must protect. This poses two important challenges for us according to the actors involved:

From the perspective of the tour operator, it must guarantee adequate information and education for the behavior of tourists in the ecosystem, but it must also be organized to reduce the impact of visits on the environment, for example, avoiding the use of disposables, guaranteeing collection spaces, marking the places where you can stay, avoiding excessive noise, among others.

While, from the perspective of the visitor, the didactic

nature of the experience should be highlighted, the opportunity to educate their children about the protection of life and natural heritage, as well as the opportunity to enjoy and learn from the cultures that interact with the ecosystem.

Ecotourism is a responsibility that guarantees fun, health, life and above all, education to value the gifts of Mother Earth to her sons and daughters.

In Venezuela there is not a single State that does not have an Ecotourism potential to offer, apart from the internationally recognized natural beauties of the State of Bolívar, Falcón, Nueva Esparta, Mérida, Sucre and the Los Roques Archipelagos. The Venezuelan plains are rich in landscapes, culture and stories. The Amacuro Delta and

its waterways populated by the interesting Warao people, The Amazon with its gastronomy and sacred mountains that invite ancestral spirituality. The Central Coast States with their Afro-descendant culture and the delicious taste of Cocoa and its products.

We have a lot to offer the world and the time is right to start doing it. Hand in hand with our President Nicolás Maduro we are entering a new stage, where entrepreneurship is the horizon and Ecotourism is responsible entrepreneurship for life.

## Up to date with Nicolás

@NicolasMaduro
