For the XXVII COP27

Venezuela participates in the preparatory meeting of the Group of Like-Minded Developing Countries

The head of the Ministry of People's Power for Ecosocialism, Josué Lorca, spoke on behalf of the Venezuelan State, at the online meeting of the Ministers of the Group of Like-Minded Developing Countries (LMDC), with the purpose of unifying the details of the nations of the organization at the XXVII Conference of the Parties to the United Nations Framework Convention on Climate Change (COP27).

"There is no doubt that the climate crisis is the greatest challenge for the world and especially for our countries" he said.

Regarding the consequences of the atmospheric phenomenon, he stated that "its impacts are already being seen in different sectors such as agriculture, health, water, ecosystems and biodiversity, as well as in human settlements".

"In Venezuela, we have been extremely affected by the torrential rains, which have left an unfortunate balance of human and material losses", he said.

He added that "the picture is not at all encouraging, it is estimated that, if greenhouse gas emissions continue at the current rate, in 2050 the number of people in developing countries affected by water stress could increase by 50%".

He said that there are also manifestations with the increase in the number of extreme weather events, such as hurricanes, floods and droughts, as well as infectious diseases in developing countries.

Likewise, he pointed out that the atmospheric phenomenon is added "not only the pandemic that has left a great world economic recession, but also that many of our countries

Venezuela demands fulfillment of climate promises as

have been victims of the unjust Unilateral Coercive Measures, restricting access to finances to face Due to the adverse weather events we are experiencing, we are facing a scenario that could be classified as an undeclared war"

"This year the COP27 will be held, 7 years after the Paris Agreement, and the developed countries have still not fulfilled their climate financing promises, they evade their historical responsibilities, they continue to be the main culprits of the catastrophe that we are experiencing with their perverse system. capitalist that has brought us to this point that scientists call a point of no return, and defer the commitment, so that the Implementation of measures in terms of financing, losses, damages, and adaptation, can be a reality that helps the most vulnerable", he claimed.

In this sense, he alluded to the fact that countries have had to face the terrible effects of the climate crisis with their own financial

resources, despite the fact that our carbon emissions are low. "That is why from the Bolivarian Government of Venezuela, we are doing everything possible to make the voice of our country heard. We are working together, with a critical conscience, to reverse this climate crisis that the global hegemonic powers and their unfeasible development model have caused".

"We want to emphasize that this group of Like-Minded Developing Countries (LMDC) is very important for our country. We believe that raising our voices in a forceful, cohesive manner on important issues in the fight against the Climate Crisis is essential to demand compliance with the commitments made by the countries with historical responsibilities and we can access the climate financing that is so necessary to achieve the goals proposed in the Paris Agreement", he assured.

Climate crisis

They train more than two thousand people in the construction of risk maps

With the participation of 2,416 people inside and outside Venezuela, the Ministry of People's Power for Ecosocialism (Minec), promoted the forum "Construction of community risk maps, as a strategy for adaptation and mitigation to climate change".

The talk was given by the geology specialist Lucía Barboza Siri, who indicated that at this time the issue "is important for our country when we have a hydrometeorological phenomenon in development that has mainly affected the state of Aragua".

"In my undergraduate work I worked on the geology of the Vargas state after the 1999 tragedy. I have worked with everything that has to do with risks, mainly geological ones, mass movements, torrential flows, torrential avalanches, landslides, landslides, as it is commonly called", he said.

He added that the presentation intends "that the communities take ownership of their risk situation, so that they can take mitigation, rehabilitation and prevention measures, to avoid and preserve human life".

Prior to Barboza's intervention, the head of Ecosocialism, Josué Lorca, welcomed the audience and pointed out the relevance of the topic because "he hopes that they will be multipliers of vital information for Venezuela, which is one of the countries most affected by climate change".

He added that the forumchat workshop "will be a key tool for these adaptation processes, this new form of planning that our president Nicolás Maduro spoke about".

"We have to plan again, rethink the country based on climate change, in climate crisis, because our world has reached a point of no return and climate change is irreversible, we are facing a climate crisis and we as a society, nation, world adapt", he said.

Barboza explained what risk maps mean as a spatial representation of threats (dangers), vulnerability and physical spaces and safe facilities.

Communities must take ownership of their situation

The geologist spoke about the usefulness of risk maps, the stages for their preparation, hazard analysis, conceptualization of vulnerability, inventory and location of resources, and map drawing.

In the end, Barboza asked himself "And then what do we do with the map? To which he responded with three obvious advantages: possible evacuation plans and communal emergency care are observed; Plans are made to reduce risk conditions (reduce vulnerability) and it is disseminated through alternative media and community meetings.

He assured that in cases of emergencies, WhatsApp groups are very useful for disseminating stops and warehouses, among others.

"The idea is that people from looking at the map so much get to take ownership of it and are clear about which are the safe areas of their community, where they should go at the time of an emergency. The more the map is disseminated, the more certainty we have that the entire evacuation and risk mitigation process will work," he said.

He referred that "the community, even if it is affected by a phenomenon, an adverse event, is going to take some actions that are going to preserve life because it is the main objective and that the communities can take shelter in safe areas."

UTEC Cojedes

Deliver 100 wooden kits for the recovery of school chairs

They plan to deliver 5 thousand kits

The Ecosocialist Territorial Unit (UTEC) Cojedes of the Ministry of People's Power for Ecosocialism (Minec), delivered 100 wooden kits to the Liceo Bolivariano San Carlos, as part of the Desk Recovery Plan, promoted by the Bolivarian Government led by President Nicolás Ripe.

The information was released by the director of the UTEC in the entity, Rafael Pérez Siso, who indicated that "following the guidelines of the holder of the portfolio for ecosocialism Josué Lorca, this activity was carried out that seeks the rescue of the chairs tables in the classrooms".

He also pointed out that the wood was donated by the Cojedes Sawmill, which has been ready to promote this plan that benefits students in the region.

He assured that this is the first delivery made by Minec in the state with the goal of providing schools with approximately 5,000 thousand kits.

During the activity, public servants of the Minec, organized Popular Power, students, teaching and administrative staff of the campus participated.

Cojedes

More than 200 workers benefited from a day of comprehensive care

The Ministry of People's Power for Ecosocialism (Minec), held a day of comprehensive care for active and retired workers in the state of Cojedes, as well as the attached entities, Misión Tree, National Institute of Parks (Inparques) and National Company of Reforestation (Conare).

The operation, with the support of the Ministry of Health, benefited the workers with care in general medicine, vaccination (yellow fever,

influenza, toxoid, Covid-19); blood glucose tests, blood pressure measurement and HIV screening.

Shoes, underwear and shirts were also sold at solidarity prices, through Plan Z with the support of the Ministry of Commerce.

In the operation, faith of life, attention to retirees, pensioners and active workers were also updated; training was given on the online systems that Minec has for authorization procedures in RACDA, SIGETRAT, SIFORTRAT.

Amazon Expo 2022

Minec exhibits on biodiversity in southern Venezuela

Between Thursday, October 20 and Saturday, October 22, the ExpoAmazonas 2022 was held in Parque Los Caobos, in Caracas, in which Amazonian products, local gastronomy, indigenous crafts and ancestral natural medicine were exhibited.

The Ministry of People's Power for Ecosocialism (Minec) participated in this first Amazonian exhibition that arrives in the Metropolitan Area of the capital, with two stands, in which attendees were able to learn about the biodiversity of southern Chile through forums and

exhibitions. Venezuela, as well as witness different cultural representations from this entity.

"We are complying with the strategic lines of the La Nueva Amazonas Project, specifying: Strengthen the identity, historical memory and regional self-esteem of the Amazonian people, recognizing their interculturality," said the governor of the entity, Miguel Rodríguez.

ExpoAmazonas 2022 is an activity that takes place in the "Indigenous Resistance Month".

Cineforo Climate Change, Peoples, Planet and Life

Minec screened the documentary "Our consumption"

The General Directorate of Training of the Ministry of Popular Power for Ecosocialism (Minec), continues with the cycle of film forums called Climate Change, Peoples, Planet and Life, with the projection of the documentary "Our consumption", in which consumption is reflected of an average person in Latin America.

The piece explains how products have a cost for society and the planet, which stems from the production and consumption habits of modern and advanced societies.

The film explores the consequences and effects on human beings and the environment, such as toxicity to living beings, the ability to contaminate water, the atmosphere or the soil.

The director of Dissemination of the Training Directorate, David Álvarez, pointed out that the audiovisual is transmitted with the purpose of making a conscience call to the citizens and that they take into account the consumption that they have throughout their lives, in order to ensure that apply product reduction and practice recycling.

UTEC Barinas

Barinas workers receive comprehensive care

The Ministry of People's Power for Ecosocialism (Minec), offered 256 people, including active workers, retirees, pensioners and their families from the Barinas region, a day of comprehensive care at the institution's headquarters in the city's Carmen parish from Barinas.

In the operation, health care was provided with general medicine, pediatrics, dentistry, vaccination against yellow fever and Covid-19, and medicines were sold at solidarity prices, through the mobile pharmacy.

Likewise, driver's licenses and medical certificates were processed and issued by the National Institute of Land Transportation (INTT), as well as identification cards were delivered to workers.

In the administrative area, we proceeded with life certificate updates, attention to retirees, pensioners and active workers in matters inherent to human management.

Likewise, an informative talk was given by the General Director of the Office of Information and Communication Technologies, Giovanni Bagnarol, to 36 workers, to explain the various online systems that Minec has for authorization procedures in RACDA,

SIGETRAT, SIFORTRAT , which seeks to strengthen their operation.

In total, 13 children were seen in pediatrics, general medicine 24 adults and 2 children, dentistry 21, 40 vaccines against yellow fever and 14 against Covid-19 were applied.

Regarding the licenses, 27 were processed and 20 medical certificates were granted, 13 life certificate updates were made and 37 Minec worker identification cards were delivered.

The event is expected to promote integration among the Institution's workers, through activities of fun, entertainment, learning, reinforcing values and reaffirming identity with the Institution.

The objective is to offer workers a variety of options for their physical, intellectual, recreational and cultural development, which contribute to strengthening their comprehensive training.

Minec empowers the working class

RELEASE

The Ministry of Popular Power for Ecosocialism (Minec), in the state of Mérida, informs the community that a security protocol has been activated by the Biological Diversity team in the protective zone of the Albarregas River Basin, parish of Lasso De La Vega, due to the presence of Spectacled bear specimens.

The spectacled bear is the only species of its kind that exists in South America and is in danger of extinction due to the growth of cities, the expansion of agricultural frontiers and human activities.

We call on the community not to be alarmed and not to approach the sighting area, since the presence of people stresses these animals and limits the possibility that they will soon return to their natural habitat.

Spectacled bears are curious animals, but not aggressive. They like to feed on fruit trees such as guava trees, cinaros, higuerones and bromeliads. This species is protected by the Biological Diversity Law and any action that threatens or violates its integrity may be subject to sanctions.

Minec, as the governing body in environmental matters, makes the free number 0800-Ambient (0800-2624368) available to the population; on instagram @miecosocialismo and @minecmerida to report any eventuality.

Let's continue together building the Ecosocialist Homeland, because Ecosocialism is the trend
