Consolidating public services is essential. Photo: VSPOPS

The authorities of entities that make up the Sectoral Vice Presidency of Public Works and Services (Vsops) held a meeting to evaluate the Strategic Plan of the body for 2023, from the main headquarters of the Ministry of Popular Power for Electric Energy in Caracas.

The meeting was headed by the head of the aforementioned ministry, G/J Néstor Reverol, who affirmed that this plan has the objective of further consolidating public services in the country.

The also Minister of Electric Energy reported that for this 2023 they will focus on two fundamental pillars: the first is the 1x10 system of Good

Government, promoted by the President of the Republic, Nicolás Maduro, which to date has served 80% of the reports presented by the Venezuelans.

"We are designing strategies to continue advancing in the percentage of attention to our people," said Vice President Reverol.

He stated that the second pillar consists of the Comprehensive Maintenance of the Systems and structural Projects of each one of the ministries and entities that make up the Sectoral Vice Presidency of Public Works and Services.

"Projects that are under development (...) as well as the maintenance of the

different systems: electrical, hydrological, public works machinery, mass land transport, among others, both in corrective and preventive matters," he explained.

He assured that to comply with this Strategic Plan there are professionals who will be able to continue facing the challenges that arise in this new stage.

"We are going to face them with a lot of wisdom, intelligence and professionalism, and I am sure that we will defeat them," he concluded.

29 research projects financed

Venezuela participated in 22 international events and conferences on the climate crisis in 2022

The Ministry of Popular Power for Ecosocialism (Minec), during the year 2022, aware of the climate crisis, participated in 22 international events and conferences with the aim of generating agreements and environmental goals with the countries of the world.

The information was released through the Twitter account @MinecOficial, a platform through which some of the most relevant achievements in the ministerial portfolio were also detailed.

In addition to the following activities:

- The 1st National Congress of Researchers on Climate Change was held to promote the development of studies on climate change that has impacted the planet due to predatory capitalism.

- In it, 12 research areas and 120 thematic axes were addressed, with the participation of more than 5000 people.

- The National Climate Crisis Observatory was created for the diagnosis, monitoring and evaluation of the effects of the climate crisis.

- 29 research projects related to the climate crisis were financed by the national government, at the national, regional and state levels.

- 3 bulletins on the climate crisis were developed, a booklet of the Brigades Against Climate Change and a special bulletin on the most impactful Hydrogeomorphological Events.

- 960 exponents of the Brigades Against Climate Change were deployed in several states, to carry a message of awareness house to house.

- The Brigades against Climate Change together with the Ecosocialist Management team deployed throughout the national territory, raising awareness among the population about the terrible effects of the climate crisis.

- A total of 2,099 species from the native fauna collection were kept under conservation and protection in the El Pinar, Caricuao Zoo and Generalísimo Francisco de Miranda recreational parks.

For his part, Minister Lorca reiterated through his social networks that during the year 2023 he will continue to lead the unstoppable fight against the Climate Crisis and the creation of an active environmental awareness in a balanced relationship with Mother Earth.

Venezuela will continue to lead the unstoppable fight against the Climate Crisis

National Reforestation Plan

In 2022, 8.798.422 trees were produced and established in the country

As part of the outstanding events in 2022, the Ministry of Popular Power for Ecosocialism (Minec) announced that during the year 2022, 8,798,422 plants were produced and established in the country, through the various programs they executed.

The figure was reached through 1,347 forestry activities, which included reforestation days and the implementation of five programs carried out by the Minec: Family Agroforestry, Sembrando Vida, A Student a Tree, Eco-urbanism and Conserving, contemplated in the National Plan for Reforestation 2022-2023.

"Family Agroforestry" was conceived as an agricultural production system to be developed by agro-producing communities in alliance with community members, and to cultivate forest and fruit trees.

For its part, "Sembrando Vida" intends to restore the vegetation cover in the watersheds that have been prioritized, considered as water suppliers to the main reservoirs that supply the vital liquid to the Venezuelan population.

Meanwhile, "One Student, One Tree" seeks to get the student population to commit to the production, care and planting of trees, as a guarantee of their future.

Ecourbanismo focuses on the recovery and creation of urban spaces of high ecological quality that allow the full development of humanist and ecosocialist awareness among the population.

"Conserving" seeks to carry

Forest Motor advances by leaps and bounds

out actions that lead to the preservation of forested areas and endangered species.

The programs of the National Reforestation Plan benefited 4,065,328 students, 263 urban developments and 24 hydrographic basins, with the participation of 1,083,886 people spread over 14,100 hectares.

Among the agreements that were reached is the one agreed with the Venezuelan Corporation of Guayana (CVG), through the company Maderas del Orinoco for the production of various species of forest plants.

Motor Forestal granted 491 export permits for wood products

Forest Engine

Forestry production was promoted through rolled and sawn wood, slats, rods, beams, palm leaves, charcoal, shavings and firewood, among other derivatives.

Additionally, 491 export permits for sawn wood products and rolls of various species were granted, with which 1,065,088 jobs were generated.

To contribute to the maintenance and restoration of the furniture in the educational structures, the Minec participated with the supply of wood and the recovery of 11,994 "tables-chairs" from 1,720 schools and 404 high schools.

Likewise, the Minec contributed with the conditioning of 526 forest industries, with which 2,418 jobs were generated.

This as part of the actions that promote the 11th Engine of the Bolivarian Economic Agenda and national strengthening.

Endangered specie

They rescue Caiman from the Coast in the municipality of Guacara

Officials from the Ministry of Ecosocialism and Inparques, rescued a specimen of the Coastal Caiman (*Crocodylus acutus*), in an area of the La Araguaita sector, Guacara municipality, Carabobo state.

Spokesmen for the entity reported that the report was made by the community organized through the 1x10 of Good Government and the 0800-Ambiente telephone line.

The reptile, approximately 25 years old, is three meters long and weighs about 200 kilograms.

The specimen was transferred to the Las Delicias Zoo, in the city of Maracay, for evaluation.

The Caiman de la Costa "was abandoned in an irregular captivity situation and thanks to the complaints from the community they were able to find its whereabouts and safeguard it".

It was learned that the discovery was made in the vicinity of the OMG Logística company in the La Araguaita community.

In addition, Carabobo Firefighters, the GNB Environmental Nursery, Carabobo Forest Firefighters and officials from the Valencia Zoo Aquarium participated in the transfer.

After its arrival in Aragua state, the reptile was placed in an enclosure for the management of alligators, whose pond is in suitable conditions so that it can be fully submerged.

It was known that the Caiman of the Coast was named as Patanemo.

According to specialists, this species is in danger of extinction, so it is expected that, soon, it will be assigned a pair for its reproduction and its reintroduction to nature as a conservation strategy.

They plant fruit and ornamental trees

The director of the Environment of the Mayor's Office of Guacara, Wilmer Hernández, reported that during 2022, more than 21,000 forest, fruit and ornamental trees were planted, in order to turn the municipality into a green area.

"From April to mid-December 2022, a total of 20,219 ornamental plants were planted in the city, 1,040 forest and 450 fruit trees, for a total of 21,673 trees propagated in different areas of Guacara", he detailed.

Similarly, Hernández commented that the conservation of trees will depend on the care they receive from citizens.

"We are satisfied with the deployment and work of our crews, which have traveled throughout the year to the different points of our city, sowing life, offering the Guacareños, as established by Mayor Johan Castañeda, better natural spaces," he said.

Five hundred visitors enjoy the area

Amadea cruise ship docks at the Guamache International Port in Margarita

On January 3, the Amadea Cruise docked at the International Port of Guamache, on the Island of Margarita, with more than 500 passengers.

This was reported by the People's Power Minister for Transportation, Ramón Velásquez Araguayán, on his Twitter account @rvaraguayan: "The Amadea Cruise Ship is already in the International Port of Guamache on Margarita Island, with more than 500 passengers ready to enjoy of the kindness, kindness and attention of Venezuelans".

The arrival of this vessel strengthens the Motor Tourism and boosts the national economy. The Venezuelan authorities stressed that in recent months work has been carried out on tourist

infrastructure for the attention of visitors.

For his part, the People's Power Minister for Tourism, Alí Padrón, expressed that "we continue to advance with the Motor Tourism. Venezuela for several years has not received cruise ships, much less from Europe. And now we have them here, most of them German, but also other nationalities from Spain, Belgium, France, today enjoying the beautiful island of Margarita".

The tour of the tourists had the following routes: Punta Arena, Macanao Peninsula, La Restinga National Park, Porlamar, La Asunción, San Diego, Playa El Ángel and Playa El Agua.

"Venezuela was off the tourism radar, and we have managed to incorporate it as the tourist attraction

that it is, thanks to articulation and many meetings that we had last year. What comes in this 2023 is to continue working", expressed Padrón.

For his part, the Minister of People's Power for Ecosocialism, Josué Lorca, highlighted through his social networks the importance of maintaining and preserving natural spaces so that they become tourist attractions for both Venezuelans and foreigners. foreign.

The cruise ship is owned by the Amadea Shipping Company, operated in the Phoenix Reisen fleet, and has eight passenger decks, seven bars, two restaurants, a library, cinema, hospital, stage, beauty salon, gym, and mini golf, among other services.

UP TO DATE WITH NICOLAS

@NicolasMaduro
01/05/2023

I congratulate the new board of directors of the National Assembly chaired by the deputies @Jorgerpsuv, as President, @Pinfantea, First Vice President and the deputy @Amkvalentina, as Second Vice President. May 2023 - 2024 be of success and blessings for our Homeland.

@NicolasMaduro
01/04/2023

It has been gratifying to hear the great recognition, respect and admiration of world leaders towards the feat of a victorious and ordinary Venezuela, which does not bow to the empires of the world. May this 2023 continue to consolidate our beloved Homeland!

@NicolasMaduro
01/04/2023

Before, Venezuela imported more than 80% of its food, now, thanks to high-impact industrial growth, 94% of the food that goes to people's homes is produced. Production and growth for our Homeland!
