Regarding the 10th anniversary of the planting of Commander Chávez

1.342 Student Ecological Brigades sworn in in Caracas

The Caracas walnut is a tree that is in critical danger of extinction

The People's Power Minister for Ecosocialism, Josué Lorca, and his counterpart for Education, Yelitze Santaella, swore in 1,342 Student Ecological Brigades, in an act that took place in the Ali Primera Recreational Park, west of Caracas.

During the day, which was replicated in the rest of the 23 entities of the country in commemoration of the 10th Anniversary of the planting of Commander Hugo Chávez, a planting was carried out in the park areas and seed collection.

The event was attended, in addition to the heads of Minec and the Ministry of Education, the mayoress of Caracas, A/J Carmen Meléndez, the deputy of the National Assembly (AN), Grecia Colmenares and representatives of the National Youth Directorate of the Party United Socialist of Venezuela (Jpsuv).

In this regard, Minister Lorca commented that "we are going to plant a Caracas walnut tree, which on June 4, 2006, President Chávez placed in the

Waraira Repano National Park to launch the Tree Mission."

"The Caracas walnut is a tree that is in critical danger of extinction. It is estimated that less than 500 remain in this entire area. It is a tree typical of the capital of the country and that disappeared due to human voracity," said Lorca.

He explained that "when the Europeans invaded us, walnut wood was the most precious in the capital and everything they built during those first 300 years was made of walnut; A sample of this is that the old Central University of Venezuela, which is next to the Capitol subway station, its doors are made of walnut wood.

"We have undertaken with the Tree Mission, on the instructions of Commander Chávez, and that President Nicolás Maduro maintains, a recovery of this species and we have nurseries everywhere. We are planting walnut trees in all the river basins of Caracas, because it is a tree of water, of life, and it grows quickly near bodies of water," he said.

He pointed out that "in honor of our Commander, of life, of peace, we are going to place this beautiful Caracas walnut tree, with the Ecological Brigades, the present and the future of the Bolivarian Revolution".

For her part, Mayor Carmen Meléndez sent "a greeting to all the girls and boys, to our youth in Caracas; Today we are excited because we are commemorating the 10th anniversary of the planting of our Commander Hugo Chávez, planting trees throughout the national territory".

"Our Commander Chávez, in his Plan for the Homeland law, in his Fifth Historical Objective, told us and gave us the instruction to preserve the planet, so I invite everyone to take care of our planet," Meléndez said.

During the activity, 59 Koi fish were also released, "which come to strengthen the awareness of care for all living beings that inhabit our Mother Earth," explained Minister Lorca.

Extraordinary meeting in Rome, Italy

Intergovernmental technical delegates for Forest Genetic Resources evaluate progress of the Global Plan of Action

The Intergovernmental Technical Working Group on Forest Genetic Resources held its seventh meeting at the headquarters of the Food and Agriculture Organization of the United Nations (FAO) in the city of Rome, Italy.

The appointment was agreed by the Commission on Genetic Resources for Food and Agriculture, which decided that the working group would meet before the next ordinary meeting of the Commission, in order to examine the existing progress in the application of the Action Plan for the conservation, sustainable use and development of forest genetic resources.

Said plan seeks to reinforce the sustainability of the management of forest genetic resources and contribute to the achievement of the Millennium Development Goals, the post-

2015 agenda and the Goals of the Strategic Plan for Biological Diversity 2011-2020 (Aichi).

In Venezuela, the Ministry of Popular Power for Ecosocialism (Minec) develops lines of action that strengthen the management of forest genetic resources and contribute to the achievement of the Millennium Development Goals.

The Venezuelan delegation was made up of Haifa El Aissami, ambassador and permanent representative of the country to the FAO, as well as Zoraima Echenique, director of Forest Heritage at Minec, who took the opportunity to meet with Zhimin Wu, director of the Forestry Division of FAO.

Said private meeting was propitious to remember and thank on behalf of the Venezuelan people and President Nicolás Maduro, for the financing granted for the

Sustainable Forest Management Project in the country whose scope details will be presented shortly.

FAO highlights that Venezuela incorporates children's literature for environmental education

Likewise, the Venezuelan delegation handed over to the FAO publications department, the physical and digital works produced by the Environmental Education Foundation, through the Amalivaca publishing house.

Anne Aubert, Director of Publications of the FAO, highlighted the Venezuelan initiative in the incorporation of children's literature for environmental education in that nation and explained that the strategy will be taken as an example and applied in the international organization.

More than 30,000 officials deployed

Activated the Unified Command against Forest Fires in Aragua

The objective is to prevent and fight forest fires that have occurred in the country

The Sectoral Vice President for Citizen Security and Peace, A/J Remigio Ceballos Ichaso together with the People's Power Minister for Ecosocialism, Josué Lorca, activated the Unified Command against Forest Fires, from the Henri Pittier National Park in Aragua state.

This Command constitutes a joint strategy between the Ministries of Popular Power for Ecosocialism and Interior Relations, Justice and Peace, with the objective of preventing and combating forest fires that have occurred in the country, as well as to recover the areas affected by these events.

"We are at the beginning of the dry period, where high temperatures are recorded, caused by the climate crisis in the world, produced by a savage capitalism that voraciously destroys natural resources and

affects our ecosystems," said Caballos.

During the activation, equipment was delivered, such as: cuff gloves, ophthalmic polycarbonate visors, helmets, hose cloths, vests for air operations and motorized units for special groups dedicated to prehospital emergency and rescue care.

The head of the citizen security portfolio emphasized that "the task must be comprehensive prevention for life and peace, which is framed in the Great Peace Quadrants Mission and which derives from the Constitution and the Homeland Plan for the strengthening of the Risk Management System".

The Chief Admiral was accompanied by the Governor, Karina Carpio, and the People's Power Minister for Ecosocialism, Josué Lorca, who highlighted

that this year a total of 533 events have been fought in the national territory, with an average impact of five thousand 200 hectares, which represents a reduction compared to the year 2022.

In this regard, the head of Ecosocialism announced that it is a custom that has been repeated in recent years "the formal installation of the (CNUCIF), which is activated with all institutions, citizen security organizations and the entire National System of Management of Risk on the part of the Minister of the Interior, Justice and Peace".

"CNUCIF is activated in the 23 states and the Capital District, it is commanded by the National Risk Management System, together with the Minec, in which the Governors, Mayors, regional Civil Protection directorates participate, all added to contain the forest fires

Bolivarian Government decorated 53 firefighters and forest firefighters

and anthropogenic threats, which spill over into protected natural areas, the Areas Under the Special Administration Regime (ABRAE)", said Lorca.

The National Risk Management System has more than 30,000 officials, including Forest Firefighters, Park Rangers and volunteers who are deployed in the national territory through the Unified Command against Forest Fires 2023.

Heroes and heroines of the Homeland

As part of the recognition made by the Bolivarian Government of President Nicolás Maduro, 53 firefighters and forest firefighters were decorated, who participated in the Mission of the Humanitarian Task Force, G/J Simón Bolívar, against forest fires in Chile.

On this subject, the Minister of People's Power for Ecosocialism, Josué Lorca, stated that "it is a great pride and honor to decorate the 53 heroes and heroines who left our name high, the name of Bolívar and the Homeland in the brother town From Chile".

Likewise, Ceballos Ichaso presented the Francisco de Miranda Order award and congratulated the entire team that traveled to the Republic of Chile. "Today we recognize the courage of the men and women who took the lead, in direct combat for the protection of the Chilean people."

Prevention and mitigation of forest fires

The Minec manages the Single Registry of Forest Fires (REUINFO), a tool that allows

decision-making and quick and effective responses, in addition to the importance and contribution to scientific research regarding forest fires in the country.

With REUINFO, data is collected, graphic representations and descriptive statistical measures are generated, which facilitate the estimation analysis on the regularity, trajectories, influence and prolongation of these events, which optimizes the operations to be carried out in future cases.

In the Bird Well sector of the Las Mayas National Highway

Four adult sloths and one baby released in La Mariposa Reservoir

A total of four adult specimens and one young of sloths (*Bradypus variegatus*) were released in the Pozo de Pájaros sector of the Las Mayas National Highway, in the surroundings of the La Mariposa Reservoir, by a commission made up of servants of the Ministry of Popular Power for the Ecosocialismo (Minec) and staff from the Chuwie Foundation,

The rescue and release delegation was made up of 12 people from UTEC Capital and Miranda, Minec and the Chuwie

Foundation, who proceeded to release three males and one female that weighed 6.27 kilograms with a lactating calf.

One of the species was rescued in Ruiz Pineda, from a residential area due to being at risk of canine attack; two other males were taken from a private residence where they were in danger of being electrocuted and harassed by dogs; and a fourth sloth was extracted from the Pacheco sector in San Antonio de Los Altos, Los Salías municipality, exposed

to electrocution and siege by canines.

The animals were under the protection of the members of the Chuwie Foundation, an organization that maintains a rescue and rehabilitation center for sloths in Los Altos Mirandinos, until last Friday when they proceeded with the release in areas considered suitable for their development.

Rescue and release delegation was made up of 12 people

Comprehensive training

Trujillanos received induction on water purification for consumption

In order to guarantee the quality of the water supplied in the region, a workshop was held in the El Cumbe sector of the La Beatriz parish in the state of Trujillo, for the "Correct Use and Management of Chemical Substances", which are used in the process of treating water for human consumption.

Among the aspects discussed were chemical elements such as chlorophyll gas and aluminum substrate, as accelerating agents in the water

purification process, the effects on health, the environment, recommendations for use and measures to follow in case of leaks.

The induction took place at the Hidrológica de la Cordillera Andina (Hidroandes) treatment plant in the mentioned area, with the participation of 25 workers, the plant manager, the person in charge of Human Resources, operators and staff in general.

The course is in line with the indications of President Nicolás Maduro Moros, executed by the People's Power Minister for Ecosocialism, Josué Lorca, in a job together with the entity's governor, Mayor Gerardo Márquez.

Permanent monitoring

Minec promotes training workshop on RACDA in Trujillo

The Environment Directorate of the Valera municipality, in Trujillo state, offered a Training Workshop for the Registry of Activities Capable of Degrading the Environment (RACDA).

The activity had the participation of personnel from the Ministry of Popular Power for Ecosocialism (Minec) and the Municipal Environment Department, in which they discussed the powers of permanent inspection, permits and records granted by Minec and environmental adjustments for mechanical workshops that do not require RACDA registration, provided they comply with environmental regulations.

Among the topics discussed was the registration of activities capable of degrading the environment, purpose of registration, laws and decrees that facilitate the requirement of registration to companies that carry out an activity capable of degrading the environment, registration expiration, types of RACDA

registrations, companies that must be registered, the online system, requirements required for registration and registration benefits for companies.

The moment was used to report on the boarding days that the Minec plans to start in the coming days, to the companies that carry out an activity capable of degrading the environment in the Valera municipality, a novelty before which the municipal servants showed great willingness to the accompaniment, but as observers for learning.

Emphasis was placed on the joint work carried out by State entities to strengthen the national policies issued in terms of collection.

This induction complies with the guidelines indicated by President Nicolás Maduro Moros, executed by the Minec in the Andean region.

Training for the Registration of Activities Capable of Degrading the Environment

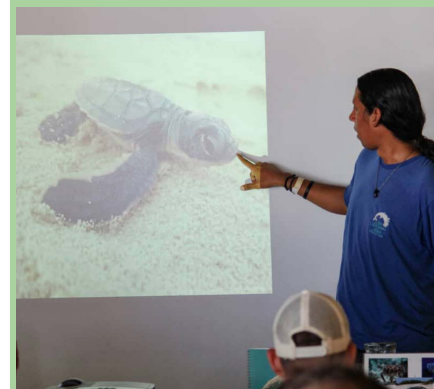

Comprehensive defense of ecosystems

Second workshop on sea turtles was held at Parguito Beach

In order to protect the integral defense of ecosystems, the Ministry of People's Power for Ecosocialism (Minec), developed the "Workshop on Biology, Stranding and Rescue of Sea Turtles", at Parguito Beach, located in the Antolín del Campo municipality, of the state of Nueva Esparta.

It was a joint effort for the conservation and protection of sea turtles that lay their eggs on the island of Margarita, which included the participation of representatives of the Antolín del Campo Mayor's Office, Forest Firefighters, tourist service providers, the Bolivarian National Police (PNB), Waterland, lifeguards, Environmental Guard of the Bolivarian National Guard (GNB), Coast Guard, Fundación Amigos Tortugueros, marine biologists and the Ministry of Tourism, among others.

Playa Parguito is one of the areas where the largest number of turtles are received for spawning. Most types of sea turtles migrate, although not all do. Those that take part in the migration, for breeding or to find food, may travel hundreds or thousands of kilometers to reach their destination. Many of them return to the place of their birth to spawn.
