## Reciven will process recyclable solid waste in Caracas

*At the beginning, 150 tons of solid waste will be reclassified and in three months it is expected to increase to 2,500 tons*

**A**s part of the Caracas Plan "The new face of conscience", the Ministry of People's Power for Ecosocialism (Minec), in alliance with the Mayor's Office of Caracas, inaugurated the Venezuela Recycling plant (Reciven).

The structure has the purpose of reducing the solid waste produced and spread in the Capital city, as an alternative to the work carried out so far by the Technical Recycling and Cleaning Tables (Metras).

The mayoress of Caracas, A/J Carmen Meléndez, and the head of Minec, Josué Lorca, were at the start of Reciven's operations in the Caricuao ecological parish, where 10 operational vehicles were delivered, repaired by the company Sermac de the Mayor's Office

and a new one, at the disposal of the city of Caracas, for the development and maintenance of the streets, in search of an ecosocialist capital territory.

Minister Lorca detailed the importance of raising awareness among the people, from the family, children and parents to grandparents, around the use of materials and solid waste, such as paper, cardboard, glass and plastic, among others.

"This plant adds to the work of collecting and reducing solid waste in the capital, starting with 150 tons and with the goal that in 3 months 2,500 tons of garbage will be reclassified to be reused in other products," he explained.

Lorca also highlighted the existence of different initiatives in organized communities in

which an exchange of collected usable materials is carried out, for community services or solutions, such as elevator repair, gardening and white water systems, among others.

These types of projects have been established throughout the national territory, with the example of the Recycling School inaugurated in Barcelona, promoted and managed by the local People's Power, in alliance with the Government of Anzoátegui, headed by Luis José Marcano, and the Minec, in what constitutes a technological, industrial and eco-socialist plan, which guarantees the collection, use and reduction of solid waste, to achieve a cleaner and greener country.

10 years after planting

## Sectorial Vice Presidency of Services and Public Works honored Commander Chávez

**A**s part of the commemorative acts of the 10th anniversary of the planting of Commander Chávez, the ministers that make up the Sectorial Vice Presidency of Services and Public Works, paid tribute to the leader of the Bolivarian Revolution.

The commission was led by the Vice President and Minister of Popular Power for Electric Energy, G/J Néstor Reverol, accompanied by the head of Ecosocialism, Josué Lorca; Attention of the Waters, G/D Rodolfo Marcos Torres; Public Works, G/D Raúl Paredes, Transportation, G/B Ramón Velásquez Araguayán, the president of the Anonymous Telephone Company of Venezuela (Cantv), M/G Jesús

Aldana, and the president of PDVSA Gas Comunal, Caryl Bertho.

In the Flower of the Four Elements, in the La Montaña Barracks, of the 23 de Enero parish in Caracas, the authorities placed a floral offering and exalted the legacy of Chávez and the love he showed for the Venezuelan people.

In his Instagram platform account (@reverolnestor), the sector vice president Reverol, referring to President Hugo Chávez, stated that "we remember the lessons he left us and that made us grow as a nation, defending Bolivarian ideals."

Authorities paid tribute to the Flower of the Four Elements

Red tide in Caracas

## Minec accompanied the transfer of the Anti-imperialist Saber of Commander Chávez

**T**he Ministry of People's Power for Ecosocialism accompanied the show of love and loyalty of the Venezuelan people to the Revolutionary Project, together with the red tide that took over the streets of Caracas.

With a civic-military caravan, which protected and accompanied the saber received by Commander Chávez at the House of Blue Dreams, a caravan was held to honor the memory of the Supreme Commander, as a symbol of love for the Homeland and spiritual strength, which encourages the militants of the Bolivarian Revolution in the construction of a just, prosperous and peace-loving society.

A solemn ceremony, based on military protocol, honors the memory of the Supreme Commander, recreated and commemorated his planting, through the transfer of the "Anti-imperialist Saber", in a caravan that simulated the procession that transferred the mortal remains of the Commander 10 years ago Chávez to the 4F Mountain Barracks.

The team from the Ministry of People's Power for Ecosocialism (Minec) participated in the commemorative acts for the 10th anniversary of the leap to immortality of Commander Chávez, with the massive incorporation of the servants who make life in the institution and represent the construction and consolidation of the Ecosocialist Homeland.

For the future of the country

## They call on young people to take actions to preserve the environment during National Congress 2023

**T**he Minister of People's Power for Ecosocialism, Josué Lorca, participated in the installation of the 2023 National Youth Congress, as a member of the Youth Staff.

The initiative is promoted by the President of the Republic, Nicolás Maduro Moros, for the creation of the Great Venezuelan Youth Mission.

The meeting was also attended by the Youth Staff, the PSUV National Youth Directorate, the National Directorate of the Venezuelan Federation of Secondary Education Students (Fveem), the Venezuelan Federation of University Students (FVEU), delegates territorial and sectorial youth, Vice President Mervin Maldonado, Vice President Gabriela Jiménez and the Minister of Education, Yelitze Santaella.

The purpose of the meeting is to hold discussions on various proposals regarding education, culture, economy, theater, entrepreneurship, sports, and housing, in an effort to guarantee improvements in life, development, and opportunities for Venezuelan youth.

During his participation, Minister Lorca thanked everyone present and highlighted the importance of the meeting to resurface and reinvent himself, in addition to the different projects and public reforms that have been implemented since the mandate of Commander Chávez to the present.

He pointed out that the aim is to strengthen the youth sector and everything that composes it, mainly in education, science and technology. Also, he highlighted the difficulties that Venezuelan

youth faced before the arrival of the Bolivarian Revolution.

The head of Minec urged the young ecosocialists to take actions to preserve the environment in order to guarantee a future for all the next generations.

"Our Bolivarian Revolution is made only with the people. It is a communal revolution, it is done only with the youth, it is a revolution of and for the youth. It is done only with women, it is a feminist revolution, it is gender-based, and our Bolivarian Revolution has to be eco-socialist. If the Bolivarian Revolution is not eco-socialist, there will simply be no revolution for the future," he said at the end of his speech.

Minister Lorca assured that the Bolivarian Revolution has to be ecosocialist

Two Metras were installed

## 45 Mangrove Guardians sworn in in Higuero

*Socialist Commune Carenero and providers of Tourist Services of Green Beach join recycling*

In the Lagoon The Queen in the Brión de Higuero municipality, Miranda state, a group of Guardians of the Mangrove was sworn in and two Technical Recycling and Cleaning Tables (Metras) were installed.

In the act, 45 people were sworn in as Guardians of the Mangrove, in order that their actions guarantee the protection of the areas and ecosystems of the region, while they are expected to bring knowledge about the conservation and recovery of the mangroves and wetlands of Higuero.

The main sources of protein that guarantee the survival of the population come from the mangroves, and therefore the importance of teaching and motivating the population in the conservation and recovery of these spaces.

The Restoration Plan is based on the National Program of President Nicolás Maduro Moros, which refers to the Fifth

Objective of the Homeland Plan 2019-2025: "Contribute to the preservation of life on the planet and the salvation of the human species".

For her part, the Head of Government of the Carenero Socialist Commune, Heydi Hernández, indicated that "we have to emphasize that both the Metras and the care of the environment, we must take it to the houses, because we are the ones who are going to raise these children who already have a brigade".

"They are sworn in as the Metra Ecosocialista Brigade, which will work within the Community Councils", he said.

I add that "the idea is to extend it to the entire Miranda state, because it is there where embraced, as President Hugo Chávez taught us, the organized people are the ones who lead, while the government and the authorities are there to guide us and we do it accordingly." The best way".

Meanwhile, the director of the Office of the Mayor of the Brión Municipality, Víctor Castellano, was present at the swearing in of the Metras and the Guardians of the Mangrove.

"On behalf of the mayor, we want to express our support for these programs, so that we all support the conservation of our beaches, the wetlands, a legacy left to us by our commander Hugo Chávez and continued by President Nicolás Maduro Moros, and it is in the constitution", he claimed.

This activity was carried out to establish recycling, in the Socialist Commune Carenero and Playa Valle Seco Tourist Service Providers in Higuero, through the recovery of reusable waste, which can be generated in the axis of Valle Seco Carenero and allow the sanitation of the Lagoon The Queen ecosystem.

To create public policies with greater impact

## First international workshop on vulnerability and adaptation to the climate crisis held

**W**ith the purpose of seeking possible solutions to the ravages caused by the climate crisis in the country, the first international workshop called: "Extremes, vulnerability and adaptation to climate change: towards the biennial transparency report (NDC-BTR)" was held. sponsored by the Ministry of Popular Power for Science and Technology and the Venezuelan Institute of Scientific Research (IVIC).

The information was provided by the head of the recently created IVIC Global Environmental Crisis Center, Carlos Méndez, who pointed out that the activity has allowed for an exchange of knowledge and experiences, with international and national experts, on the subject of the climate crisis. and its effects.

Representatives of the Ministry of Popular Power for Ecosocialism participated, which carries out the issue throughout the national

territory of the climate crisis and the National Institute of Meteorology and Hydrology (Inamec) which is in charge of monitoring climate throughout the country.

The climate expert explained "we are looking for and creating the right conditions to start a conversation between the entities, in charge of designing public and scientific policies, which through knowledge, make these public policies have a greater impact."

## Venezuela participates in the Workshop of the Youth Platform for Climate Justice

**V**enezuela, through the Ministry of Popular Power for Ecosocialism (Minec), participated online as a speaker in the "Startup Workshop 2023 of the Youth Platform for Climate Justice (PJJC)" of the Plurinational State of Bolivia.

The presentation was given by the general director of the Climate Change Monitoring Directorate, attached to the Vice Ministry for the Preservation of Life and Biodiversity, Yusbelys Belisario, and was attended by 92 people in Bolivia.

The purpose of the meeting is to publicize the international experience of awareness campaigns that have been developed on climate change in Venezuela and the results in the country on house-to-house awareness on the subject.

Among the topics covered: United Nations Framework Convention on Climate Change, Paris Agreement, Multilateral Organizations, Environmental Legal Framework of the Bolivarian Republic of Venezuela, Action for Climate Empowerment,

What are the Brigades against Climate Change ?, Objective of the Brigades Against Climate Change, Functions of the Brigades Against Climate Change, Organizational Structure of the Brigades Against Climate Change, Conformation of the Brigades Against Climate Change and Territorial Scope of Action, among others.

South America's largest chelonians

## More than 950 thousand Arrau turtles released through the National Conservation Program

A total of 964.621 individuals of Tortuga Arrau, bred in breeding centers, have been released through the National Conservation Program for the species.

Every March 19, the National Day of the Arrau Turtle is commemorated in Venezuela, an occasion that calls for the preservation of the species that is in danger of extinction.

The Arrau is one of the largest turtles in South America, also known as the Orinoco turtle. It inhabits the rivers and lagoons of the Amazon and Orinoco river basins.

They are characterized by being of variable sizes, mainly herbivorous, they are swimmers

par excellence. During the time of rise in the level of the rivers, it enters the areas of flooded forest. In Venezuela, the greatest abundance of this species is found in the Middle Orinoco.

It is a freshwater reptile, the largest in the American continent. Its carapace is grayish-brown and may have a cream-colored rim in juveniles.

It has a gray head with cream-colored spots on the tip of the snout and on each side and top of the head. Females can reach a maximum length of 89 cm and 60 kilos in weight. Males can reach a length of 55 cm and about 5 kilos.

82% of the total number of individuals, equivalent

to 790,989 turtles, were incorporated into their habitat between 1999 and 2022.

The distribution of the tortoise is not exclusive to Venezuela, as it has been registered in Colombia, Guyana, Brazil, Ecuador, Bolivia and Peru.

Prizes were awarded

## Minec promoted karaoke afternoon among its workers

The Ministry of People's Power for Ecosocialism (Minec), through the Office of Human Management, and the National Institute of Training and Recreation for Workers (Incret) promoted an afternoon of karaoke among workers.

Active servers, retirees and their families participated in the activity, who enjoyed an afternoon full of joy and music.

The more than 80 attendees supported and chanted the interpretations of some of their colleagues, who sang musical pieces such as boleros, ballads,

guarachas and merengues. At the end of the activity, prizes were awarded to the best participations.

Human Resources Minec and Incret promoted a day of recreation
