A decade of fighting against the threat of Climate Change

More than 15 lines of action demonstrate the social commitment of President Nicolás Maduro for the preservation of the planet and ecosystems

President Maduro has stood out for his leadership and political-social activism

On March 14, 10 years ago, the Venezuelan people elected Nicolás Maduro Moros as president of the Bolivarian Republic of Venezuela.

The voters trusted that with firmness and perseverance, Maduro would give continuity and strength to the legacy of the Bolivarian Revolution, promoted by the eternal commander, Hugo Rafael Chávez Frías.

Venezuelans elected with 50.61% of the votes, Nicolás Maduro as president of the country, the first to be a Chavista.

As president, Nicolás Maduro has stood out for his leadership and political-social activism that focuses on positioning Venezuela as a power, creating opportunities for Venezuelans, promoting the Bolivarian Revolution, and following the strategic lines of the Plan for the Homeland for the benefit of all.

The Head of State assumes the social commitment to preserve the planet and ecosystems, in addition to his interest and concern for the climate crisis that threatens humanity and the world.

The management of the Government of Maduro in the environmental aspect is executed by the Ministry of Popular Power for Ecosocialism (Minec), with

multiple strategies, initiatives, projects, organizations and others, to ensure the future of humanity and the environment.

Areas of environmental action addressed:

- Education: Creation of the Fruto Vivas Popular University of the Environment (UPAFV), which trains professionals and technicians for development in environmental management.
- Affordable and clean energy.
- Commitment to reduce GHG emissions (greenhouse gases) by 20% by the year 2030, as part of an important action to face the climate crisis.
- Swearing in of more than 20,000 Brigades against Climate Change throughout the country.
- Foundation of the National Observatory Against the Climate Crisis (ONCC).
- Approval of the National Revolving Fund, to address the ravages of the climate crisis.
- Installation of the Drought Monitoring System.
- Development of the National Reforestation Plan (PNR).
- Declaration of 8 new

Areas Under the Special Administration Regime (ABRAE).

- The zoocriaderos, within the Management of Biodiversity, in which 545,623 animals of various species have been bred.
- Respect and vanguard of international standards and agreements on environmental matters.
- Formation of 2,698 Recycling and Cleaning Technical Tables (METRAS).
- Strengthening of surveillance, control and security in the national territory with which 3,875 specimens have been seized in wildlife trafficking.
- Financing of 31 research projects related to climate change.
- Creation of the Civil Guard Corps.

The achievements are part of other initiatives that have transcended in scope and magnitude throughout the national territory in defense of the environment, to counteract the effects of the environmental crisis generated by the consumerist model of predatory capitalism that destroys natural resources.

Government Expo 2023

Popular Power knows scope in environmental matters

With the purpose of commemorating 10 years of the victory of President Nicolás Maduro together with the Venezuelan people, between April 14 and 16 the Government Expo 2023 was exhibited, as a symbol of loyalty to Commander Hugo Chávez, for which the Ecosocialist Management Team participated in the exhibition that took place in the Paseo Monumental de los Próceres in Caracas.

After a decade of achievements in the Revolution, the Ministry of People's Power for Ecosocialism (Minec) showed the Venezuelan people part of the achievements obtained in the ecosocialist sphere.

The attendees were able to observe the advances in the Management of Biological Diversity with the breeding in zoocriaderos of 545,623 individuals of endangered species such as the Orinoco Caiman and the Arrau Turtle, as well as details of the marine and continental turtle conservation program.

Regarding plant repopulation, data on the establishment of 19,721,150 plants among forest, fruit, ornamental and medicinal types were exhibited.

Also, there are explanations of the management of the Brigades Against Climate Change, the formation of 2,698 Technical Recycling and Cleaning Tables (METRAS) and the creation of

the National Observatory of the Climate Crisis (ONCC), among others.

The Ecosocialist Management Team received the entire Caracas family that visited its spaces at the Government Expo 2023.

Ángela Mota, a visitor, indicated that "President Hugo Chávez Frías spoke of the preservation of the human species, it is an act of conscience, of conservation for future generations; we must preserve our ecosystems and in this way comply with the Fifth Objective of the Plan for the Homeland".

Between April 14 and 16, the people of Caracas visited the Government Expo 2023

Morrocoy National Park was the busiest at Easter

More than 1 million 600 thousand ecotourists visited the National and Recreational Parks

With the "Give the Tail to your Garbage" campaign, 32,000 kilograms of solid waste were collected

A total of 1,671,025 people visited the National Parks, Recreational Parks, Natural Monuments and Zoos, during the period of Safe and Happy Easter 2023.

Among the seasonal workers there were 651,383 adults, 292,557 adolescents, 280,711 girls, 277,471 boys, 156,984 older adults and 11,909 with some mobility problem.

The park with the most influx was the Morrocoy National Park in Falcón state, with 209,391 people, followed by the Generalísimo Francisco de Miranda Recreational Park to the east of Greater Caracas,

with 205,910 visitors, then the Caricuao Zoo Recreational Park to the southwest of the capital with 147,242. , the Ali Primera Recreational Park to the west of Caracas with 111,553 and the Waraira Repano National Park with 98,014.

To care for vacationers, the Ministry of People's Power for Ecosocialism (Minec) deployed 24,811 people including servants of the institution and affiliated entities, Park Rangers and Forest Firefighters of the National Parks Institute (Inparques), Guardians of the Tree, Brigade members against Climate Change, volunteers, members of social and ecosocialist movements.

The Ecosocialist Management Team was deployed in the 23 states and the Capital District, to account for 3,633 ecological activities in 145 spaces of the Areas Under the Special Administration Regime (ABRAE). In addition, 479,826 people were reached with an environmental awareness message.

Likewise, the "Give the Tail to your Garbage" campaign was promoted and during the sanitation days, 32,070 kilograms of solid waste were collected, in an effort to preserve the natural and recreational spaces visited.

During 5th house to house journey

Environmental awareness message reaches more than 46 thousand people in the country

As part of the 5th Awareness Day Against the Climate Crisis, the Ministry of Popular Power for Ecosocialism, sowed in the town environmental awareness of love, care and protection of Mother Earth, with which it was possible to address 26 municipalities, 37 communities, 6,229 homes, 9,345 families and 46,725 people from 23 states of the country.

This was reported by the owner of the ecosocialist portfolio, Josué Alejandro Lorca Vega, through his account on the Instagram social network.

In the continuation of the house-to-house visits to carry a message of environmental awareness, the Ecosocialist Management team moved to the Santa Ana neighborhood of the Antimano parish in Caracas.

In the Peña Tovar and El 70 sectors of that populous parish, which include 179 homes in which 185 families live, they received indications about the climate crisis, in addition to the fact that the community provided opinions about the knowledge they have about the current global atmospheric situation.

In the deployment, led by the Minister of People's Power for Ecosocialism, Josué Lorca, were servants of the ecosocialist institution, Brigadistas against Climate Change, Park Rangers and Forest Firefighters of the National Parks Institute (Inparques), members of the Ecosocialist Territorial Unit (UTEC) of the Ministry for Ecosocialism (Minec), staff from the Misión Árbol Foundation and the president of the Caracas Municipal Council, Jimmy Gudiño.

Minister Lorca stressed that "with these awareness days we promote the implementation

of good environmental and ecological practices. With environmental actions we trace the path of future generations".

The head of the Hugo Chávez Battle Unit (UBCH), Iris Beltrán, explained that the community participates in the tour with the Community Councils of the place, to bring each family a message of environmental awareness that concerns all humanity.

"This is so that they don't pollute the environment and we have a clean community, where there is no waste and we are the ones who keep it clean and beautiful," she said.

Meanwhile, the National Coordinator of the Civil Park Rangers, G/J Pablo Lira, added that there is a multidisciplinary

team at the site "working on the awareness program against the climate crisis."

"It is a Minec program that raises awareness and trains all people to continue strengthening, caring for, and preserving areas, protected spaces, Areas Under the Special Administration Regime (ABRAE) and communities in general," he said.

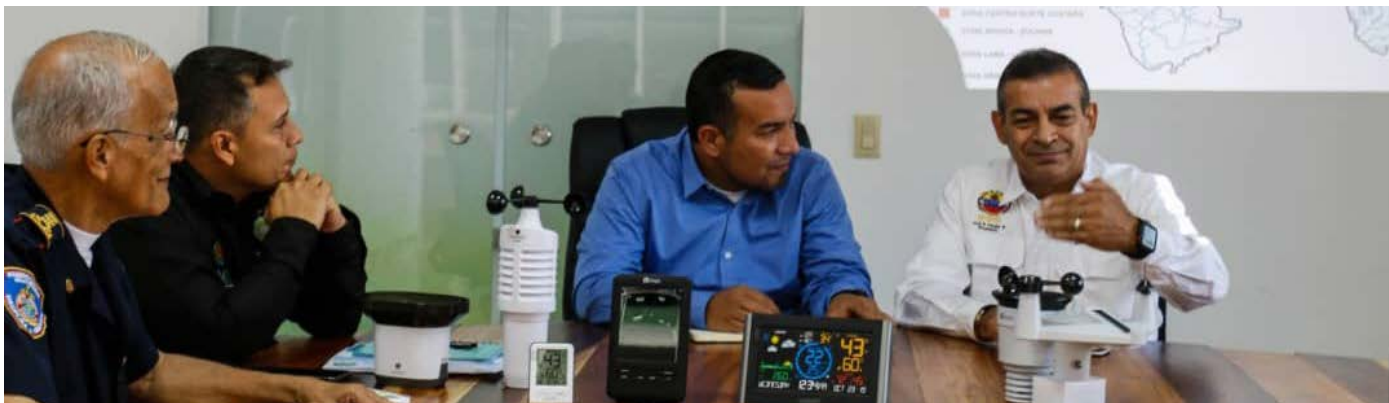

The Minec, through the Ecosocialist Management team, disseminates in the communities the recognition of the existence of spaces that present multiple risks, in addition to stressing that managing accurate and timely information contributes to the mitigation of the climate crisis.

Minec promotes the implementation of good environmental and ecological practices

Risk Management System in Aragua, Capital District, La Guaira and Miranda

Minec and Inameh will install community meteorological measurement stations

Lorca: We want our people to be informed and alert to any eventuality

The People's Power Minister for Ecosocialism, Josué Lorca, held a meeting with the president of the National Institute of Meteorology and Hydrology (Inameh), Colonel José Ramón Pereira, and authorities from the Forest Firefighters and Civil Protection (PC), to activate and continue with the promotion of work for the benefit and defense of the communities.

During the meeting, which was held in the Climate Crisis Monitoring Room at the National Observatory Against the Climate Crisis (ONCC), at the Ministry for Ecosocialism

(Minec) headquarters, the upcoming installation of the first 70 stations was announced. community meteorological measurement.

The initiative is considered unique in Latin America and consists of the preparation and instruction of communities in risk management, during the dry and rainy seasons, the collection of meteorological data, community risk management maps, all this in the context of the precaution of the effects of the climate crisis, and in compliance with the Fifth Objective of the Plan for the Homeland 2019-2023.

On this occasion, four entities have been prioritized: La Guaira, the Capital District, Miranda and Aragua, in which these stations have been installed, through a work between the Minec and the Ministry of Interior Relations, Justice and Peace, through Inameh and Community Councils to consolidate preparation for the climate crisis.

"The objective is that our people are informed and prepared for any climatic eventuality, product of the serious effects suffered by Pachamama," stressed Minister Lorca.

Under the parameters of the Montreal Protocol

Subcommittee on Substances that Deplete the Ozone Layer: ultraviolet radiation increases the chances of health problems

At the facilities of the Ministry of People's Power for Ecosocialism (Minec), the third meeting of the Subcommittee on Substances that Deplete the Ozone Layer and with Atmospheric Warming Potential.

The meeting was led by the General Director of Environmental Quality of Minec, José García, who presented the 2023 Work Plan, which took into account the priority issues of the execution schedules of the decisions adopted at

the 34th Meeting of Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer.

During the meeting, experts in the field stressed that the hole in the ozone layer increases the level of ultraviolet radiation that reaches the earth's surface, which can increase the chances of overexposure to ultraviolet rays and health problems. associated with it, such as cancer, cataracts and suppression of the immune system.

They addressed Work Plan 2023

For Cosmonaut's Day

Venezuela and Russia strengthen strategic cooperation ties

With a tribute ceremony to the brave men and women, who dedicate their efforts, time and lives to science, through space travel, Venezuela and Russia, developed in the Humboldt Planetarium, in the Generalissimo Francisco de Miranda Recreational Park, an act where he remembered the Soviet cosmonaut and pilot, Yuri Gagarin, and his historic feat, which would designate him as the first man to orbit the earth.

The ambassador of the Russian Federation in Venezuela, Sergey Mélik-Bagdasarov, and the Vice Minister of Environmental Management Services of the Ministry of People's Power for Ecosocialism, Hernán Toro, led the activity.

Cosmonaut Day was declared on April 12, 1962.

Precisely, on April 12, 1961, Russia would go down in history with the successful mission of the first aerospace flight, just as the pilot of the Soviet Air Force, Yuri Gagarin, after long months of training, would embody his name in memory of humanity.

The ambassador of the Russian Federation recalled during his speech the 62 years that have elapsed since the historical

event of technological relevance, the difficulties faced to complete the mission, and the advances of the Russian nation in aerospace matters since then, such as the first artificial satellite, the first probe sent to Mars and the first woman in space, among many others.

In the same way, he highlighted the incorporation of Venezuela, with the invitation of the People's Republic of China, to be part of the project of an International Lunar Research Station, as an important achievement, with which the development and promotion of new powers is promoted. space, in strategic cooperation of Venezuela, Russia, China, and other brother countries.

He also pointed out what was established in the High-Level Intergovernmental Commission (CIAN), held in December 2022, and in which Russia and Venezuela, in strengthening their ties and strategic agreements, managed to sign an agreement in which the establishment of the installation of a lunar station, as a contribution to the scientific and technological development of both nations.

For his part, Vice Minister Hernán Toro highlighted the

technological contribution to humanity, by the Russian nation with that first space trip and the various achievements and research that came later.

Toro indicated that among the novelties is meteorology, which can be seen, studied, analyzed and photographed by the artificial satellites that now cross the Earth's orbit, and with which quick and effective decisions can be made in the event of a crisis.

Likewise, he pointed to the communication, which has shortened distances, borders and languages and said that, "with the intelligence and capacity of human beings it is possible to find solutions in the fight that today we face as humanity in the face of the devastating environmental crisis".

The event closed with the irrigation of a plant, established two years ago with the then Minister for Ecosocialism Oswaldo Barbera, in commemoration of the 60th anniversary of the first space flight with a human crew. The plantation was a representation of the beauty, continuity and eternity of life, and in whose roots lies a time capsule with a message for future generations of wishes for peace and prosperity.

The Russian ambassador Sergey Mélik-Bagdasarov reminded the minister Oswaldo Barbera
