GETTING TO KNOW THE MINEC

DIRECTORATE-GENERAL FOR CLIMATE CHANGE MITIGATION (DGMCC)

The Directorate-General for Climate Change Mitigation is an organizational unit of MINEC with the rank of Directorate-General, which is attached to the Vice Ministry for the Preservation of Life and Biodiversity created under Decree No. 4,635 of 19 January 2022, published in the Official Gazette of the Bolivarian Republic of Venezuela No. 42,300 of the same date; under the focus of Defining, formulating, and implementing policies, strategies, plans, programmes, projects and actions aimed at Climate Change and Sustainable Development at the national level.

DIRECTORATE-GENERAL FOR COMMUNAL DEVELOPMENT

The Directorate of Communal Development was promoted on June 23, 2021, under the guidance of Minister of People's Power for Eco-socialism Dr. Josué Lorca, with the aim of developing, promoting and articulating actions that promote the leading and co-responsible participation of citizens in eco-socialist management policies, in the exercise of communal self-government by organized communities. In this sense, the participation and integration of People's Power play a fundamental role in the implementation of plans, programs and projects that guarantee the defense, awareness and protection of the environment based on respect for the rights of Mother Earth and the good living of our people, as a model to build and protect life.

OFFICE OF INTEGRATION AND INTERNATIONAL AFFAIRS

The Directorate-General for Integration and International Affairs, as part of our country's foreign policy subsystem, is the Office responsible for monitoring the implementation of international commitments under agreements and other multilateral and bilateral environmental spaces, it is also responsible for promoting, guiding, planning and implementing the country's environmental policy at the international level, providing the technical and political inputs necessary for negotiation, cooperation and follow-up in these areas, through the coordination and harmonization of these actions with the strategic lines of the Ministry and with the national interest. In this way, we seek to ensure that international environmental policies are adapted to our country's environmental requirements and developed in a sustainable and equitable manner.

COMPREHENSIVE CARE DAYS FOR OUR WORKERS

Author: MSc. María Isabel González General Director of the Human Resources Office

Citizen Minister Josué Lorca, during his tenure at the head of the Ministry of People's Power for Eco-socialism, has shown special interest in giving impetus, courage and motivation to the human talent that makes up the Eco-socialist team, recognizing that the management of human talent is one of the most critical areas of any institution.

Eco-socialist workers are the most important asset we have, and they are the success factor for management, achieving goals and results through their skills and ability in the different areas.

Within the functions of the Office of Human Management, are to plan, organize, manage, control and evaluate the human talent required for the development of the institution, through the implementation and maintenance of recruitment, selection, induction, training, social welfare, labour relations, efficiency assessment systems, and politics of salaries and wages that they allow to provide to the Department of the specializing personnel, highly trained and motivated, which guarantee protagonism, inclusion and social justice.

As a result, Citizen Minister management has focused on designing strategies and policies to benefit active workers, retirees, pensioners and family members of MINEC and its affiliated entities.

Among which we can mention the following:

- To promote the integration between the workpeople of the Institution, strengthening values and reaffirming identity with the Institution, Comprehensive Days of Care have been held for

ECO-GYM

all active workers, retirees, pensioners and their MINEC family group and affiliated entities, in order to guarantee the right to medical, sports, recreational and cultural care; carried out in all Territorial Units Eco-Socialist (UTEC), among the activities carried out, are the following: General and Comprehensive Medicine, Pediatrics, Gynecology, Triage, Vaccination, Covid 19 Tests, Dentistry, Nutritionist, Podiatry, Eyebrow Hair Removal and Pigmentation, Dancing, Taebo, Functional, Yoga, Barbershop for Adults and Children, Inflatable Mattress and Recreational Activities ation for Children ational Care ation for the Children of Workers.

To the ends of remunerating and of recognizing the effort and dedication that gave the retired and given a pension personnel per years to the Department, Recreational Days are developing for Pensioners and Given a pension of the MINEC and its Entities

assigned in the house recreacional of the National Institute of the Social services (INASS), to the beach and parks where you are offered a day of leisure and relaxation carrying out activities, such as: domino games, creole balls, bailotherapy.

- With the target to guarantee a suitable feeding to the active, retired and given a pension workpeople of the MINEC and its assigned Entities, strategies were established to improve the granted benefits and in turn to diminish the times of delivery of the same ones; planned and designed the process of receiving and delivering the Food and Protein Bag for free.
- Special days of Sale of Supplies, Fish and vegetables at solidarity prices.
- Special days for benefit of the active, retired workpeople, given a pension and such relatives as: Obtaining Driver's Licenses, Farmapatria,

Conapdis, Operating with SENIAT for the elaboration of the Income Tax Declaration and updating of the Registry of Tax Information (RIF), Operating Sworn Declaration of Wealth before the Comptroller General's Office of the Bolivarian Republic of Entry and Termination.

- For the purpose of strengthening and impelling the physical and mental health of our workpeople the EcoGym was inaugurated, at the disposal of the workpeople from Monday until Friday, being provided with specializing trainers to take to acabo plans of sports training and nutritive orientations, and all the evenings instructors of such different disciplines as functional, bailoterapias and taebo.
- It was designed and planned a program of weekly recreation that it includes: classes of sauce casino, bachata and yoga, playful dynamics, active break, I dominate, karaoke, musical and cultural activities, in order to promote the interaction between the workpeople, the experiences exchange, sharing and the diversion; resulting in a better performance of workers in fulfilling their usual activities.
- To the ends of guaranteeing the Right to health of the workpeople and its familiar group, the Minister's management has focused on improving and ensuring the care provided in the Comprehensive Medical Unit Dr. Oswaldo Barbera, through the incorporation of health professionals in different specialties and medical inputs, with the fundamental objective of a high state of physical, mental and social well-being of our workers.
- Institutional health visits have been carried out to channel special studies, medical appointments and follow-up of aid cases.
- Focused on maintaining high-performance employees, providing opportunities for growth and professional development, through a regular Performance Assessment process, training and training programmes in planning, first aid, integration and motivation, teamwork, oratory, management, high performance teams facilitating the development of skills and skills of all our workers.
- A Merit and Job Position Classification program was designed and planned, thus recognizing the work and professional trajectory of workers. It is important to highlight that trained and trained employees are more efficient and effective, achieving greater institutional commitment and greater satisfaction in the performance of their work.
- The citizen Minister has shown special interest in improving the infrastructure conditions, inputs and recruitment of Initial Education professionals, in order to give better attention to the children of the workers, who study in the PRESCHOOL ENGINEER RICARDO GONDELLES. In addition to the educational activities emanated by the Ministry of Popular Power for Education, recreational activities were designed with walks to the different national and recreational parks of the city, visits to museums, projection of educational films and cultural activities, implementation of the School Feeding Program for preschool children.
- The aim of our school is mainly to train young people with environmental and eco-socialist awareness, developing programs such as: "a student a tree," "land painting workshops," "recycling workshops," "Seed Planting Work," "Ecological Brigades".
- The fate of the planet is in the hands of our children, it is essential that from childhood they learn to value natural resources, and contribute their granite sand in the fight against climate change.

WASTE MANAGEMENT

EDUCATIONAL ENVIRONMENTAL VANGUARD

“School for Waste Management”

Author: Doct. Renny Mendoza, Teacher specializing in culture

From a process of educational work on recycling, the Bolivarian School Las Veritas founded on October 03, 1973 and converted into Bolivarian School since October 2004 and located within the geographical scope of our Communal Council “Altos de Jalisco parte baja” and the socialist Commune “Los Sueños de Chávez,” we form our ecology committee.

This committee is composed of teachers and students in 4th, 5th and 6th grade. It should be noted that these institutional groups initiated a process of awareness with recycling, where based on usable materials we elaborate ecological hats, traditional games and different resources for learning such as models, educational televisions, costumes among others.

Thus, through our outstanding participation in the different activities organized by the educational area of Lara State, we were invited to celebrate with schools and communities in the north of the city of Barquisimeto the “World Environment Day” where we carried out an activity called EcoSaber,

for the participating teams to put their environmental knowledge into practice, activity that allowed us to link up with a new municipal institution that would be in charge of recycling in our municipality called: Juntos y Juntas Recamos (JUNRECA).

Later we went as guests to a cultural ecological activity in the Zoological and Botanical Park Bararida, where we celebrated the parranda of San Pedro with cultural activities and displays of ecological work in recycling.

This first experience, we went through with some inexperience but always counting on our students and workers and teachers, who every day carried plastic containers to fill our bag.

In this sense, with the acquired knowledge we made the delivery of our first extraction of usable materials to the team (JUNRECA), which weighs 25 Kg, that day the companions of the company Municipal Juntos and Juntas Recamos, made us deliver a second bag which we started to fill next.

Immediately after our first delivery we implement what we call "Collection Wednesday" where every boy or girl, but also every teacher, worker, cooks and administrative staff carry at least one plastic container, which has allowed us to move much faster in the task of filling and delivering at least once a month our fully filled bag with approximately 60 Kg of plastic.

Then we were invited to the preparatory meeting for what would be our

participation in the great concentration of "Mother Earth Day" to be held in Caracas.

Subsequently, we participated in a Practical and Training Workshop in the operations yard of (JUNRECA), that same day, now counting on the alliance and help of the Ministry of Popular Power for Ecosocialism (MINEC) in the state of Lara we conformed and formally registered as Technical Table of Recycling and Toilet or Spanish Mesa Técnica de Reciclaje y Aseo (METRAS), called "Las Veritas Recycle," an action with which we intend to capitalize on educational benefits and materials of our recycled organization.

In the future we want to raise the proposal to transform each of the Bolivarian Schools of our municipality into a Technical Recycling and Toilet Table (METRAS), so that we can contribute both in the Environmental Education of our children and with the effort to turn our community, our commune, our parish, our municipality and our state into an Educational Environmental Vanguard.

Note that, in the Statistics of the 1st Saca, Material, the following was obtained: Plastic 25 kg, Filling time: 12 weeks.

It is important to emphasize that the work of Environmental Education that we do from the classrooms and from the celebration of the different environmental ephemerides has greatly helped the active participation of each of our students in our work as a solid waste management committee and now as Technical Bureau of Recycling and Toilet (METRAS).

ENT

THE USE OF GARBAGE WITH COMMUNAL POWER

Author: MSc. Veronica Mujica General Director of Garbage Use

The Ministry of People's Power for Ecosocialism, through policies based on the processes of inclusion of popular power, has generated impulse mechanisms for the use of non-hazardous plastic, paper, cardboard, glass and organic matter waste, where its The fundamental objective is to reduce the usable materials in final disposal sites (sanitary landfills and landfills) and to promote the circular economy, through processes that allow them to be incorporated again into the productive economic cycle in an environmentally safe way, which allows the establishment of reuse processes. and recycling, gearing the productive chain through companies of the public and social sector.

The formation of 2,700 Technical Recycling and Toilet Tables (METRAS) in the national territory, play a fundamental role in the implementation of the 3R (Reduce, Reuse and Recycle), where environmental education is the transversal axis, so that an optimum classification of the usable materials can be generated from the origin, and they can reach the production lines and obtain feasible products, and

Recycling school

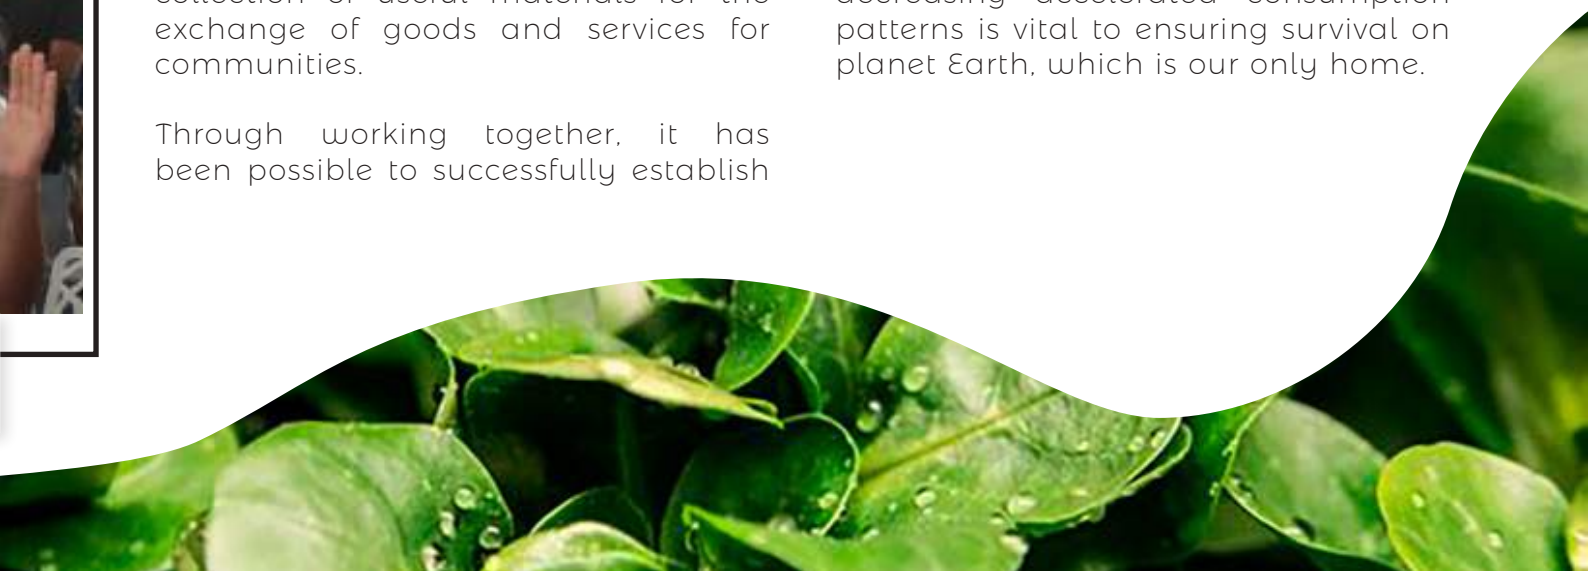

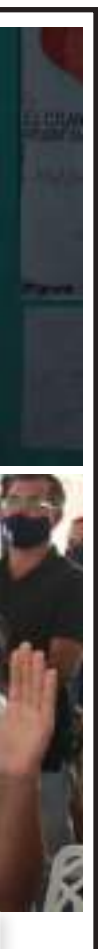

of good quality for the populations of the point and circle.

The implementation of the Recycling Schools presents an opportunity to generate productivity, in the training and manufacture of products, giving opportunity for direct and indirect jobs in the territory, and boosting the circular economy, where it is necessary to comply with the various phases of recycling, to achieve the success of the policies proposed; in addition, private companies have been involved in the collection of useful materials for the exchange of goods and services for communities.

Through working together, it has been possible to successfully establish

programs my park and school recycle in the main Recreational Parks of the country, with the collection of more than 10 tons of mostly plastic materials that has been compacted and reinserted, value chains for processing and processing of new products, and in schools to be able to establish a correct environmental education, targeted at recycling, and how pollution and climate change can be reduced through day-to-day actions.

That is why recycling is for life, and decreasing accelerated consumption patterns is vital to ensuring survival on planet Earth, which is our only home.

“LEGENDARY COCOA” (BOLÍVAR)

The Eco-socialist management team formed by Minec Ecosocialismo, Ministry of Culture and Ministry of Education, was organized in the Piar municipality of Bolívar state, to promote ecological values through different dynamics corresponding to its scope.

On this occasion, they explained through an activity called “Legendary Cocoa” the ways

to implement environmental actions that protect the land, in addition to explaining the implementation of the mixed nurseries that take place in public and private schools and institutions in the area, where primary school students from the “Julia de Bolívar” Educational Unit participated, educators and members of the Territorial Eco-socialist Unit (UTEC) of the Bolívar state.

MAY CROSS COMMEMORATION (SUCRE)

The Training Unit for Eco-socialism of the UTEC Sucre, carried out an approach to the U.E Maria Rodriguez de Vera of the parish Santa Catalina, municipality Bermúdez, on the occasion of the commemoration of the Cross of May.

During this celebration in which the children and teachers were

the protagonists, each student elaborated his respective cross decorated with gathering materials, to present them through exhibitions.

Likewise, the songs and dramatizations to the May Cross were performed through a cultural act.

TECHNICAL INSPECTION TO THE HILL THE CHIMBORAZO (TÁCHIRA)

Within the framework of the activities planned for the commemoration of the Day of the Environment, Day of the Tree and Anniversary of the Tree Mission, Technical inspection was carried out to Cerro El Chimborazo, to determine the area of the plantation for the establishment of the Forest 'Dr. Freddy Parada', effectiveness and survival of species since the last plantation. Similarly, it was heard about the alleged existence of loose livestock in areas of Chorro El Indio National Park, not being found at the time animals (cattle) in the place nor evidence of their recent presence.

COMMEMORATION OF NATIONAL TREE DAY (FALCÓN)

In commemoration of the National Tree Day a Reforestation Day was held and the launch of Avíos in the Protective Zone Park Juan Crisóstomo Falcón sector rods, in the parish Curimagua, of the municipality Petit, framed in the National Reforestation Plan 2022-2023, with the participation of the Economic and Social family of the Falcocialista.

"ONE TREE ONE STUDENT" PROGRAM (YARACUY)

In the municipalities of Nirgua and independence, the Utec Yaracuy delivered the Kits of the Program "A Tree a Student" to teachers and students of different

plants, with the objective of Environmental awareness to our youth in this way commit them from the educational spaces to Produce and Sow Life for Love to our Planet.

0800 AMBIENTE

From Táchira State, Córdoba Municipality, Capital Parish, Via San Joaquín. Through the 0800Ambiente line of care, we receive denunciation which is systematized under the number N° 1343, where we are informed that there is the felling of trees, which are of old date (More than 3 years), in an area of approximately 2 hectares, when making inquiries with the adjacent farmers, they said, That the people who carried out these

activities are no longer in the country.

The construction of ranch houses on the left side of the road was also observed, at the time of inspection no offenders were located within them. It should be noted that in January of this year, the request for the study of environmental damage was met, for which the results were forwarded to the prosecutor's office.

The following case corresponds to the State Táchira, Municipality Lobatera, Parish Constitution, Location Sector La Romera, Village Llano Grande which is registered under the number of denunciation 1737 - 1741.

By sawing and taking advantage of all plant material with the felling of 6 trees of the species eucalyptus and pine, besides the pruning of 5 trees of the species Cinare,

technical inspection is carried out on the alleged wrongdoer, who does not have environmental permission, the alleged manager of the farm was interviewed, who stated that the owner made the logging and pruning, to obtain shelves and thus fence the site, because of this was freed Activities Stoppage, retention of 15 shelves and three rolas, as well as a summons to be submitted to the environmental impact control and control office.

THE MINISTRY OF PEOPLE'S POWER FOR ECO-SOCIALISM

The participation of 2.987 male and female servers

Managing to impact a population of **231.876**
Managing to impact a population of the environment.

A close-up, underwater photograph of a sea turtle swimming towards the camera. The turtle's head and front flippers are visible, with its eyes looking directly at the viewer. The water is a vibrant blue, and the background shows a hazy coastline with mountains under a bright sky. The text 'DID YOU KNOW?' is overlaid in large, white, bold letters on the left side of the image.

DID YOU KNOW?

Sea turtles regulate their temperature with their behavior, for example, they dive deep to cool their body or swim faster to increase the heat of their temperature. Also, choose the cold or hot water currents for the same purpose.

ECOGAMES

HOW TO MAKE A GURRUMANGO?

Toy made with mango seeds and has a similar function to gurruffio.

Materials

Mango seeds

Pabulo

Two wooden sticks

Glue

Screwdriver

Scissors

Procedure

1.- Make 2 mangos and keep the pepa, which you will wash, remove the threads and put it to dry in the sun.

2.- Have by hand the following scissors, screwdriver, small knife, 2 cylindrical sticks one of about 15cm and the other 3cm, a pabulo of 15cm, paste, paint and brushes.

3.- After having dry cucumbers, you grab one and with the small knife makes an opening in the top horizontally and with the help of scissors you finish cutting. The screwdriver takes out the cottiledon inside.

4.- After pulling out the cottiledon you grab the knife and make a small puncture in the center of one of their faces.

5.- To the other pepper that you did not take the cottiledon you make a perforation in the center of one of their faces. You're going to put some glue in the punch and stick the 15cm stick.

6.- Measure the stick stuck on the outside of the other seed, as it will be very long. Taking care to leave 1cm on top, the stick should be the same size as the other piece, the surplus is cut.

7.- To the mango pepa that has the opening above, the pabulo is inserted by the huequito of the center and is taken out by the opening above. The pabulo that remains in the little hole of the center is tied at the tip a stick of 3 cm. The top of the pabulo is tied with a strong knot in the center of the stick of the other piece.

8.- To finish the piece that has the big stick is inserted by the top opening of the other piece, paint to your liking.

9.- Now grab the vertical seed with your hand and turn the other seed until the ball is rolled up.

Ready, to play!
