Venezuela has historically denounced its impact

President Nicolás Maduro highlights that Climate Change is the most influential universal phenomenon on the planet

President Maduro trusts that science, technology and innovation from Venezuela will do something to save the planet

During the launching ceremony of the Great Science, Innovation and Technology Mission Dr. Humberto Fernández Morán, the President of the Bolivarian Republic of Venezuela, Nicolás Maduro, highlighted that the “most influential universal phenomenon on the planet is climate change”.

“There is no other. It is not even the crisis of capitalism yet, nor the moral and cultural crisis of the decadence of Western society. The marker phenomenon of this year, these days and the years to come, is

the climatic emergency resulting from the destruction of the planet’s equilibrium,” he said.

Delving further into the subject, the Venezuelan President recalled that the Cuban leader, Commander Fidel Castro, was the great world figure who in 1992 already publicly warned about this issue.

“Fidel Castro, in 1992, said something like ‘a species is in danger of extinction, the human species’, and many of the world’s right wing said he was an extremist because he was a leftist. It is not extremism, Fidel studied it scientifically”, he said.

Likewise, he recalled that Venezuela also denounced this serious world phenomenon with the temperature of the planet, since 2009, at the Copenhagen Summit, with Commander Hugo Chávez Frías, “who arrived and said: let’s change the system to save the planet”.

He added that that Summit in December 2009, was the first one in which scientists denounced 15 years ago, the need to take emergency measures because humanity would be in a catastrophic situation if in the year 2030 the temperature

were to increase 1.5 degrees.

Contrasting that denouncement of 15 years ago, he maintained that in Venezuela he has already confirmed in 2024, scientifically, “that we have 4 degrees Celsius more, since last year, continuously”.

“We are in 2024, 6 years to 2030 and I am confident that science, technology and innovation can do something from Venezuela and from humanity to save the planet”, he said.

Effective coordination with on-site personnel

Timely attention has made it possible to combat and control fires in several areas of the country

The Minister of People's Power for Ecosocialism, Josué Lorca, indicated that the fires that have been registered in Caracas have been attended in a timely and efficient manner with personnel on site.

During a telephone contact with the program La Noticia, broadcast by Venezolana de Televisión (VTV), the head of Minec said that: "it is very important to inform the population, all Venezuelans, that we are in a state of alert in view of this offensive of attacks that have been occurring in these last hours, with arson attacks in different points of Caracas", he said.

He pointed out that he has been in contact and synchronization with the Mayor of Caracas, A/J Carmen Meléndez; the head of the Government of the Capital District, Nahum Fernández; A/J Remigio Ceballos Ichaso and with M/G Carlos Pérez Ampueda, for the attention of the fires.

"All the fires at the moment are with personnel on site. Those that are already fought and finished are under observation", said Lorca.

He informed that a fire in La Boyera was totally controlled. "Likewise, a fire that occurred in the upper part of Semprúm Street, in Petare, was also totally extinguished".

Likewise, he referred that the fire registered in Leonardo Ruíz Pineda Park, which forms a corridor that goes from La Vega Park, towards Cota 905, and towards the areas of the Andrés Bello Catholic University (UCAB) was contracted.

Call to conscience

He affirmed that the Ministry of Popular Power for Ecosocialism (Minec) and the National Institute of Parks (Inparques), issued a communiqué to make a call to conscience, about the beginning of the forest fires and also with information of the big ones affected: small animals, rabbits, picures, small felines, for example, in the case of Waraira

Repano, cunagueros and snakes.

"These animals normally flee after a fire and end up in urban areas. When this happens, we have always recommended to the population that in any of these cases, they keep calm and do not try to hurt the animal or interfere with its movements, since it is an animal that is in a state of shock, suffering a very big trauma due to the fire. In case you manage to get your hands on it, contact the competent authorities, who will know what to do at the right time, and where to transfer it for its subsequent reinsertion into its natural habitat", he concluded.

Minec asks urban dwellers not to mistreat animals fleeing forest fires

Space sanitation

Minister Lorca inspects El Palmar landfill in Táchira State

A joint agenda was established between the Minec and the Government of Táchira State

As part of the activities planned during his visit to the state of Táchira, the Minister of People's Power for Ecosocialism, Josué Lorca, inspected the areas of the El Palmar landfill, located in the municipality of Torbes in that Andean state.

At the place, the operations, progress and the adjustments

to which the space is being subjected, to be transformed into a sanitary landfill that complies with all the legal regulations, were observed.

Minister Lorca pointed out some guidelines on the work and expressed full support in the technical aspects for the transformation of the site, which is important

because it is the final disposal area of the Metropolitan Area of Táchira State.

In this respect, the representative of the Government of Táchira, Rafael Castro, indicated that "a joint agenda was established with the Ministry of People's Power for Ecosocialism (Minec), as the governing entity in environmental

matters, and for the state, the company Solid Waste del Táchira (Desota), the public company that manages the final disposal sites".

Castro reminded that by law the Governor's Office is responsible for the final disposal, and the municipalities for the collection.

Incorporate the People's Power to maintain a healthy environment, free of waste and solid waste

Minec and Desota establish strategic alliance for the collection of usable waste

The Minister of People's Power for Ecosocialism, Josué Lorca, held a meeting with the president of the company Solid Waste del Táchira (Desota), Rafael Castro, attached to the Government of the State of Táchira, in order to establish a strategic alliance in the collection and treatment of usable solid waste.

The agreement seeks to strengthen Desota, which operates the solid wastes of the Metropolitan area of the city of San Cristóbal, to also incorporate the members of the Recycling and Sanitation Technical Committees (Metras), Community Councils, street leaders, and all the sectors that seek a healthy environment, free of residues and solid wastes.

Castro pointed out that under the guidance of Minister Lorca, Desota will be provided with machinery in the next few days, with the purpose of consolidating the treatment of the elements and improving the use of recyclable material.

"We are expressing our pleasure and following instructions from the

citizen governor, Freddy Bernal. We welcome the visit of Minister Josué Lorca, hand in hand with President Nicolás Maduro. We state that this project is destined to a total success and will strengthen the Fifth Historical Objective of the Plan of the Homeland, related to the protection of the environment", stated Castro.

Project will strengthen the Fifth Historic Objective of the Homeland Plan

Minec launches the Forestry Authorization Procedures System (SIFORTRAT)

The Ministry of People's Power for Ecosocialism (Minec), launches the Forestry Authorization Procedures System (Sifortrat), as a control mechanism for the use and production of timber and non-timber products.

The access link will be in the Minec's WEB portal <http://www.minec.gob.ve/> available to people and companies linked to the Forestry Engine, so that the permits and processes for the use of timber resources in the national territory can be correctly managed.

In order to manage the procedures, you only need to enter <http://sifortrat.minec.gob.ve/sifortrat/>, register as a new user and follow the steps to complete the desired request.

The National Government, in its

commitment to good ecosocialist practices, continues with the development of useful tools and mechanisms for the defense and preservation of the planet and life. For this reason, we invite you to comply with Venezuelan environmental laws.

SIFORTRAT

Sistema Forestal de Trámites Autorizatorios

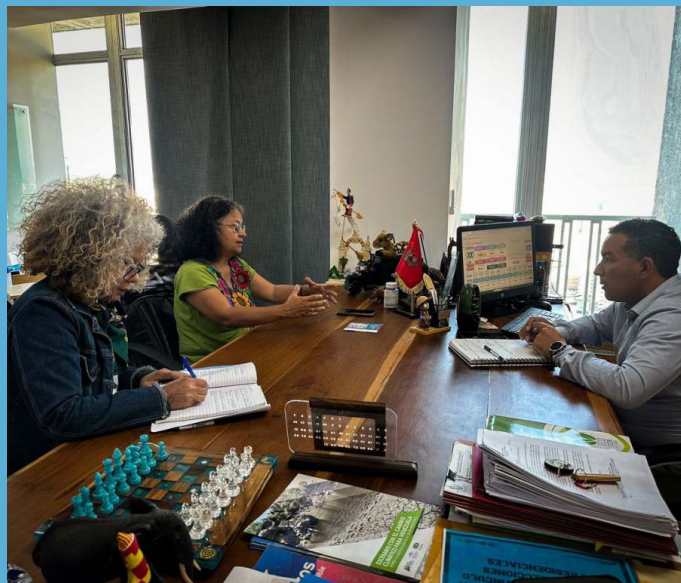

SIFORTRAT is a control mechanism for the utilization and production of timber and non-timber uses

Training for workers

Agreements with Universidad Nacional Experimental Simón Rodríguez to promote environmental research

The Minister of People's Power for Ecosocialism, Josué Lorca, held a meeting with the rector of the Universidad Nacional Experimental Simón Rodríguez, Alejandrina Reyes, in order to review the relations between the two institutions.

During the meeting, the training programs for workers of the Ministry of Popular Power for Ecosocialism (Minec) were analyzed, as well as the signing of agreements with the National Observatory of the Climate Crisis (ONCC), which will promote exchanges in the field of research.

They analyzed the training programs

Ongoing training

Minec promotes workshop on the Data Message and Blockchain Electronic Signatures Law

The Ministry of People's Power for Ecosocialism (Minec) promoted a course on the Data Message and Blockchain Electronic Signatures Law, given by Edgar Medina, trainer of the National Superintendence of Internal Audit (Sunai).

With the objective of training the legal, technological and environmental assistance personnel of the Minec, in relation to the correct use of electronic signatures as a system of validation of information, due to the process of transformation of the State towards transparency, improvement of procedures and the correct determination of responsibilities.

The Law of Data Messages and Electronic Signatures is an instrument created by the Venezuelan State to grant certainty and responsibility in the issuance of acts and messages, and thus validate in a real, effective and verifiable way, the information that is issued.

Legal, technological and environmental assistance personnel trained

THE COMMUNICATION BATTLE

@nicolasmaduro
04/13/2024

The time has come for a constitutional reform to add life imprisonment to corruption, life disqualification, to treason, to serious crimes against the people. This is my proposal! We must be relentless, whoever falls! I ask for all the support of the people in the fight against corruption.

@nicolasmaduro
04/12/2024

All my love, solidarity, support and I ask for God's blessings for our Olympic, World and Universal Champion and the only Queen of the Triple Jump. We love you and we know of your commitment and discipline, you are a warrior of life, an example for the youth, that is why you have the respect of the people. The Venezuelan athletes who will go to #Paris2024 are inspired by your example, you will always carry high the Venezuelan flag with its eight stars, we are with you, my embrace!

@nicolasmaduro
04/10/2024

God's timing is perfect! The Great Mission Science, Innovation and Technology Dr. "Humberto Fernandez-Moran" was born. After planning and consultation, we have established it for the development of inclusive science, convening, unifying and integrating the production of knowledge in Venezuela, Latin America and the World.
